-“

Next to logistics, our focus and expertise lies in your product and commodity.

”-

Fast Moving Consumer Goods

Automotive

We consistently guarantee the best solutions in logistics by a specific deadline, including packing and co-packing services.

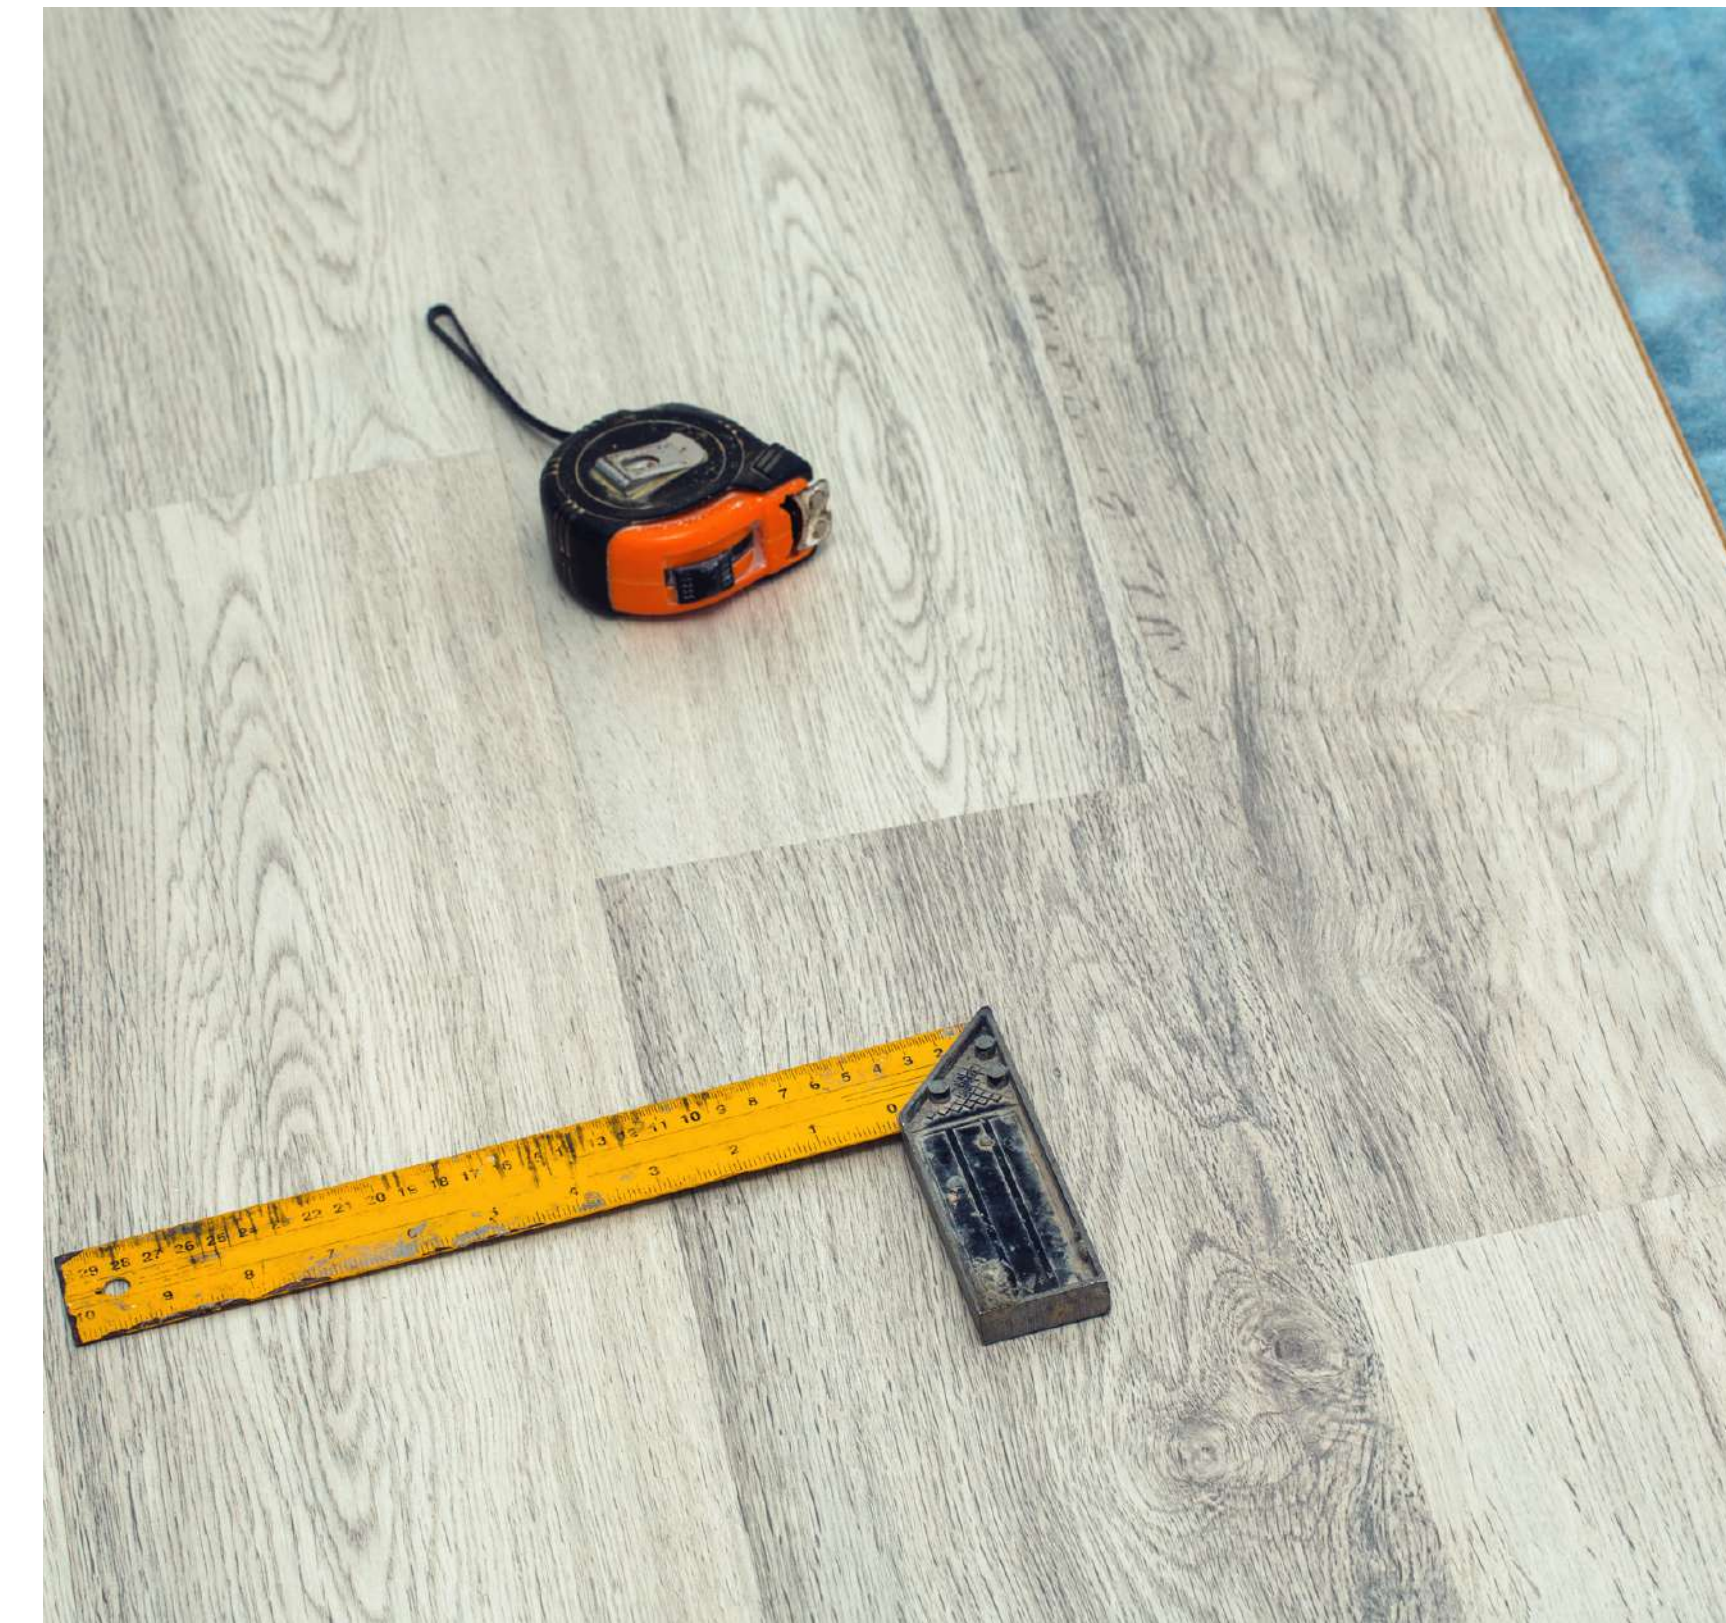

Household, Decoration & Toys

Import flows mainly originate from the Far-East and Eastern European countries. Thanks to our local partnerships and integrated IT system, we guarantee smooth processing and a fast release in any import country.

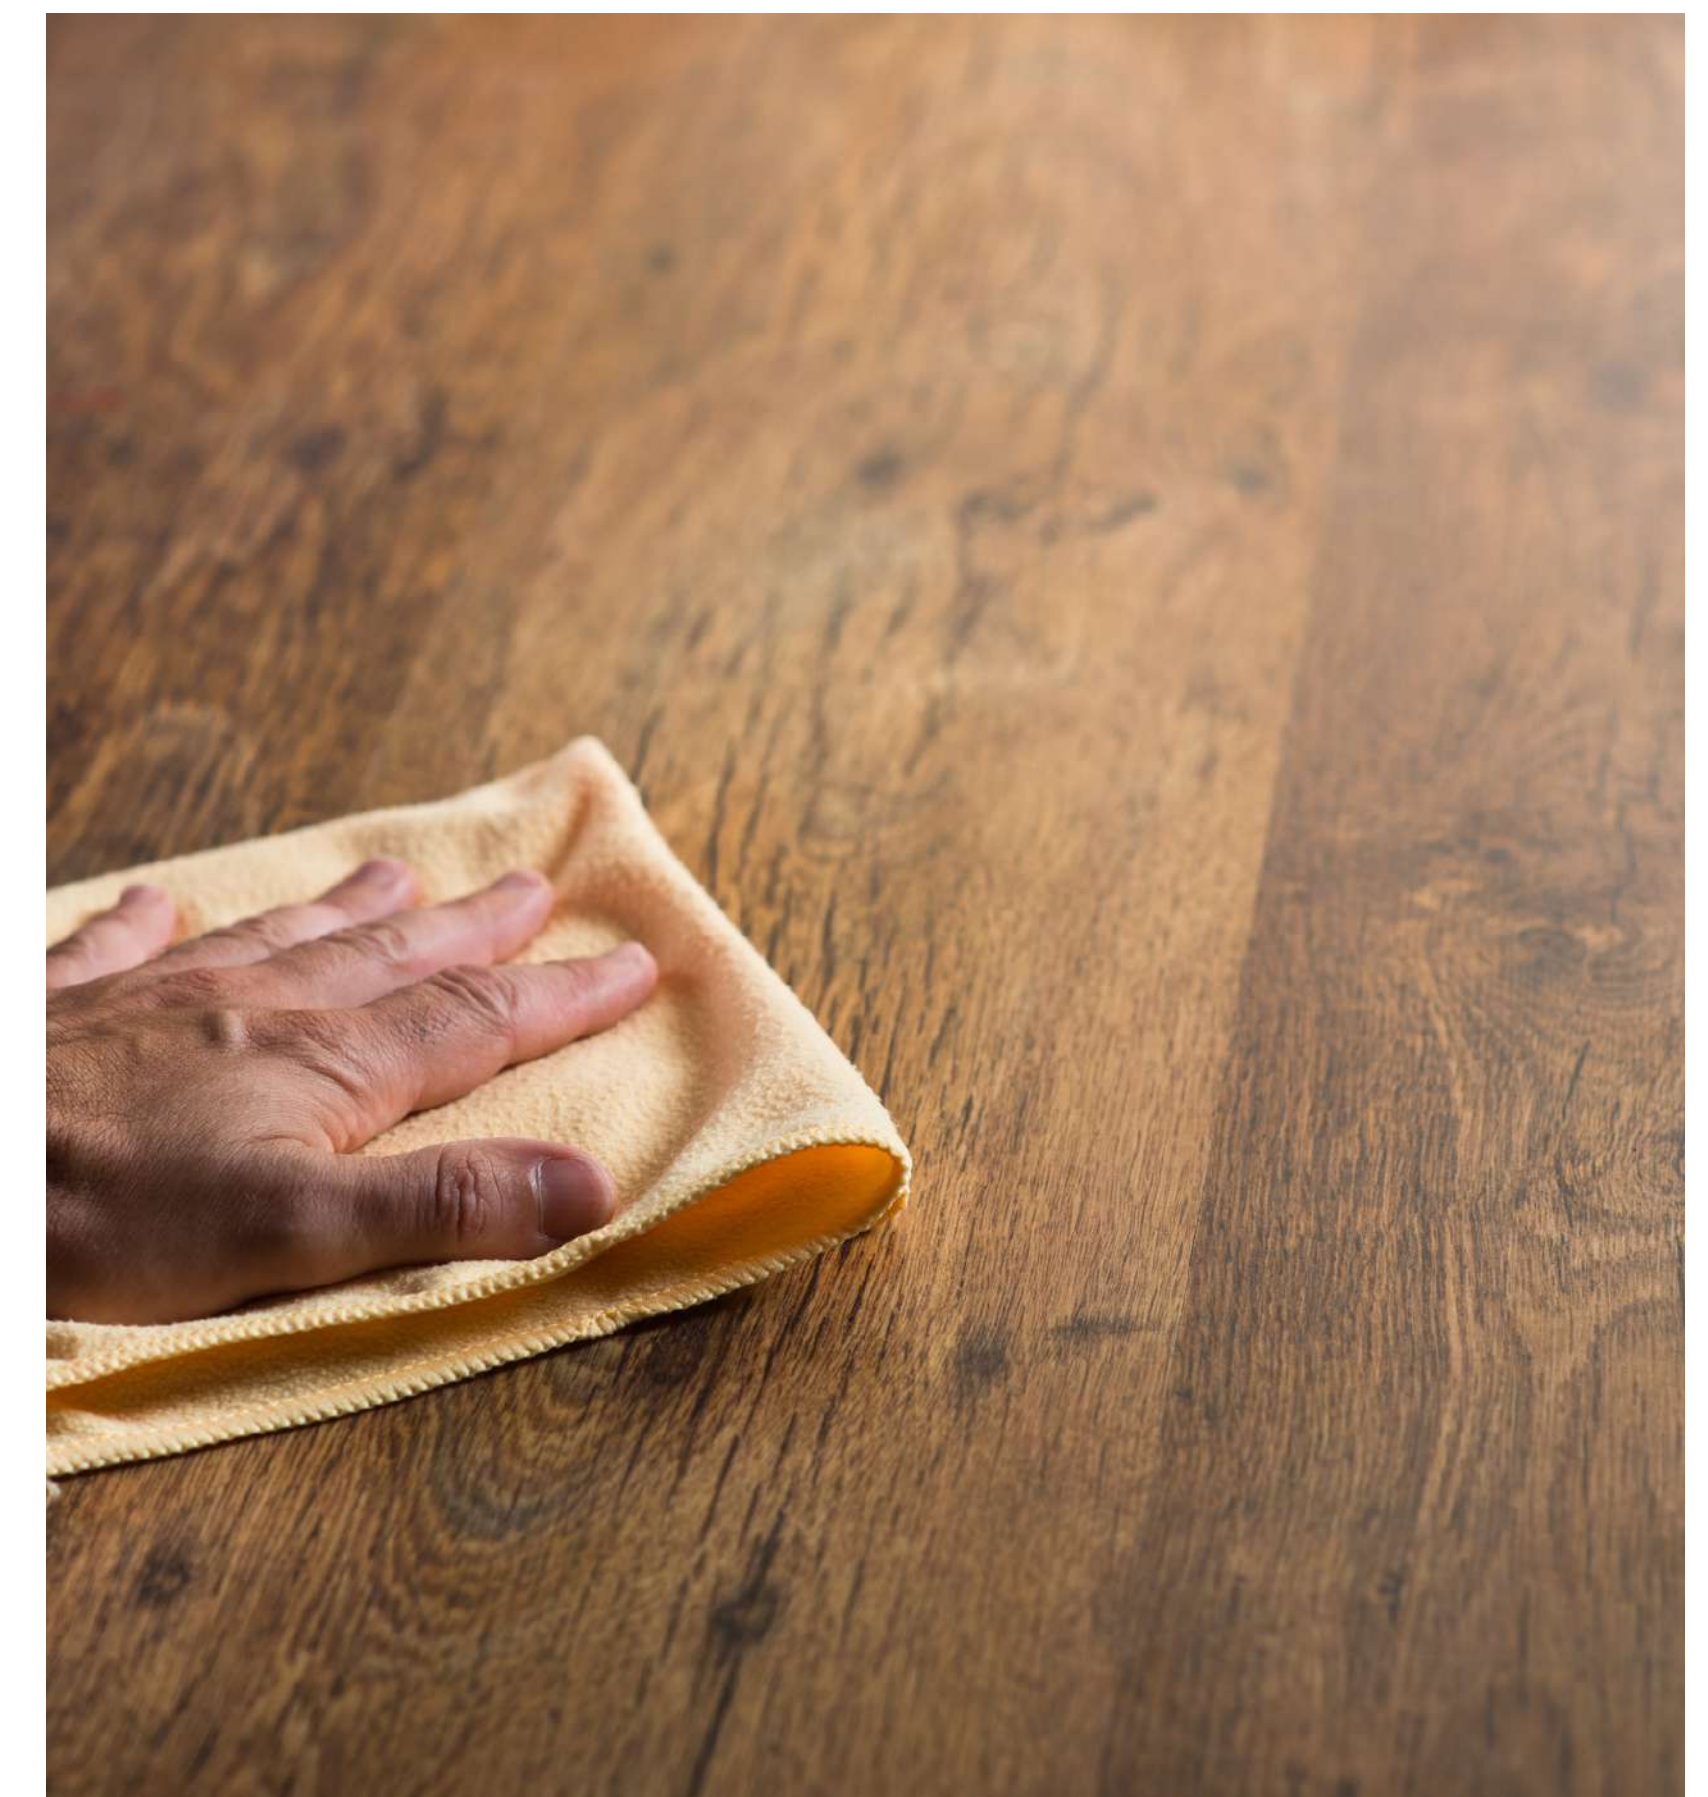

Flooring

One of our core competences for decades. Today, we are market leader in logistics for the flooring industry. 4PL services are our specialty. We help to deliver you strategy, optimize your processes and coordinate your entire flow, making use of unique digital means. Our clients choose us for our full-service approach. We assist them with all supply aspects, ranging from the production of raw materials and intermediate goods right up to the distribution of perfectly-finished floor coverings. We help in delivering their strategy, optimizing their processes and coordinating their entire flow, benefiting from our unique digital means. In collaboration with our own office and agents, all flows worldwide are centrally managed via our control tower. Acting as 4PL (fourth Party Logistics) partner, TZD Global stands for efficient and sustainable transport solutions by setting up tailor-made container transport organizations.

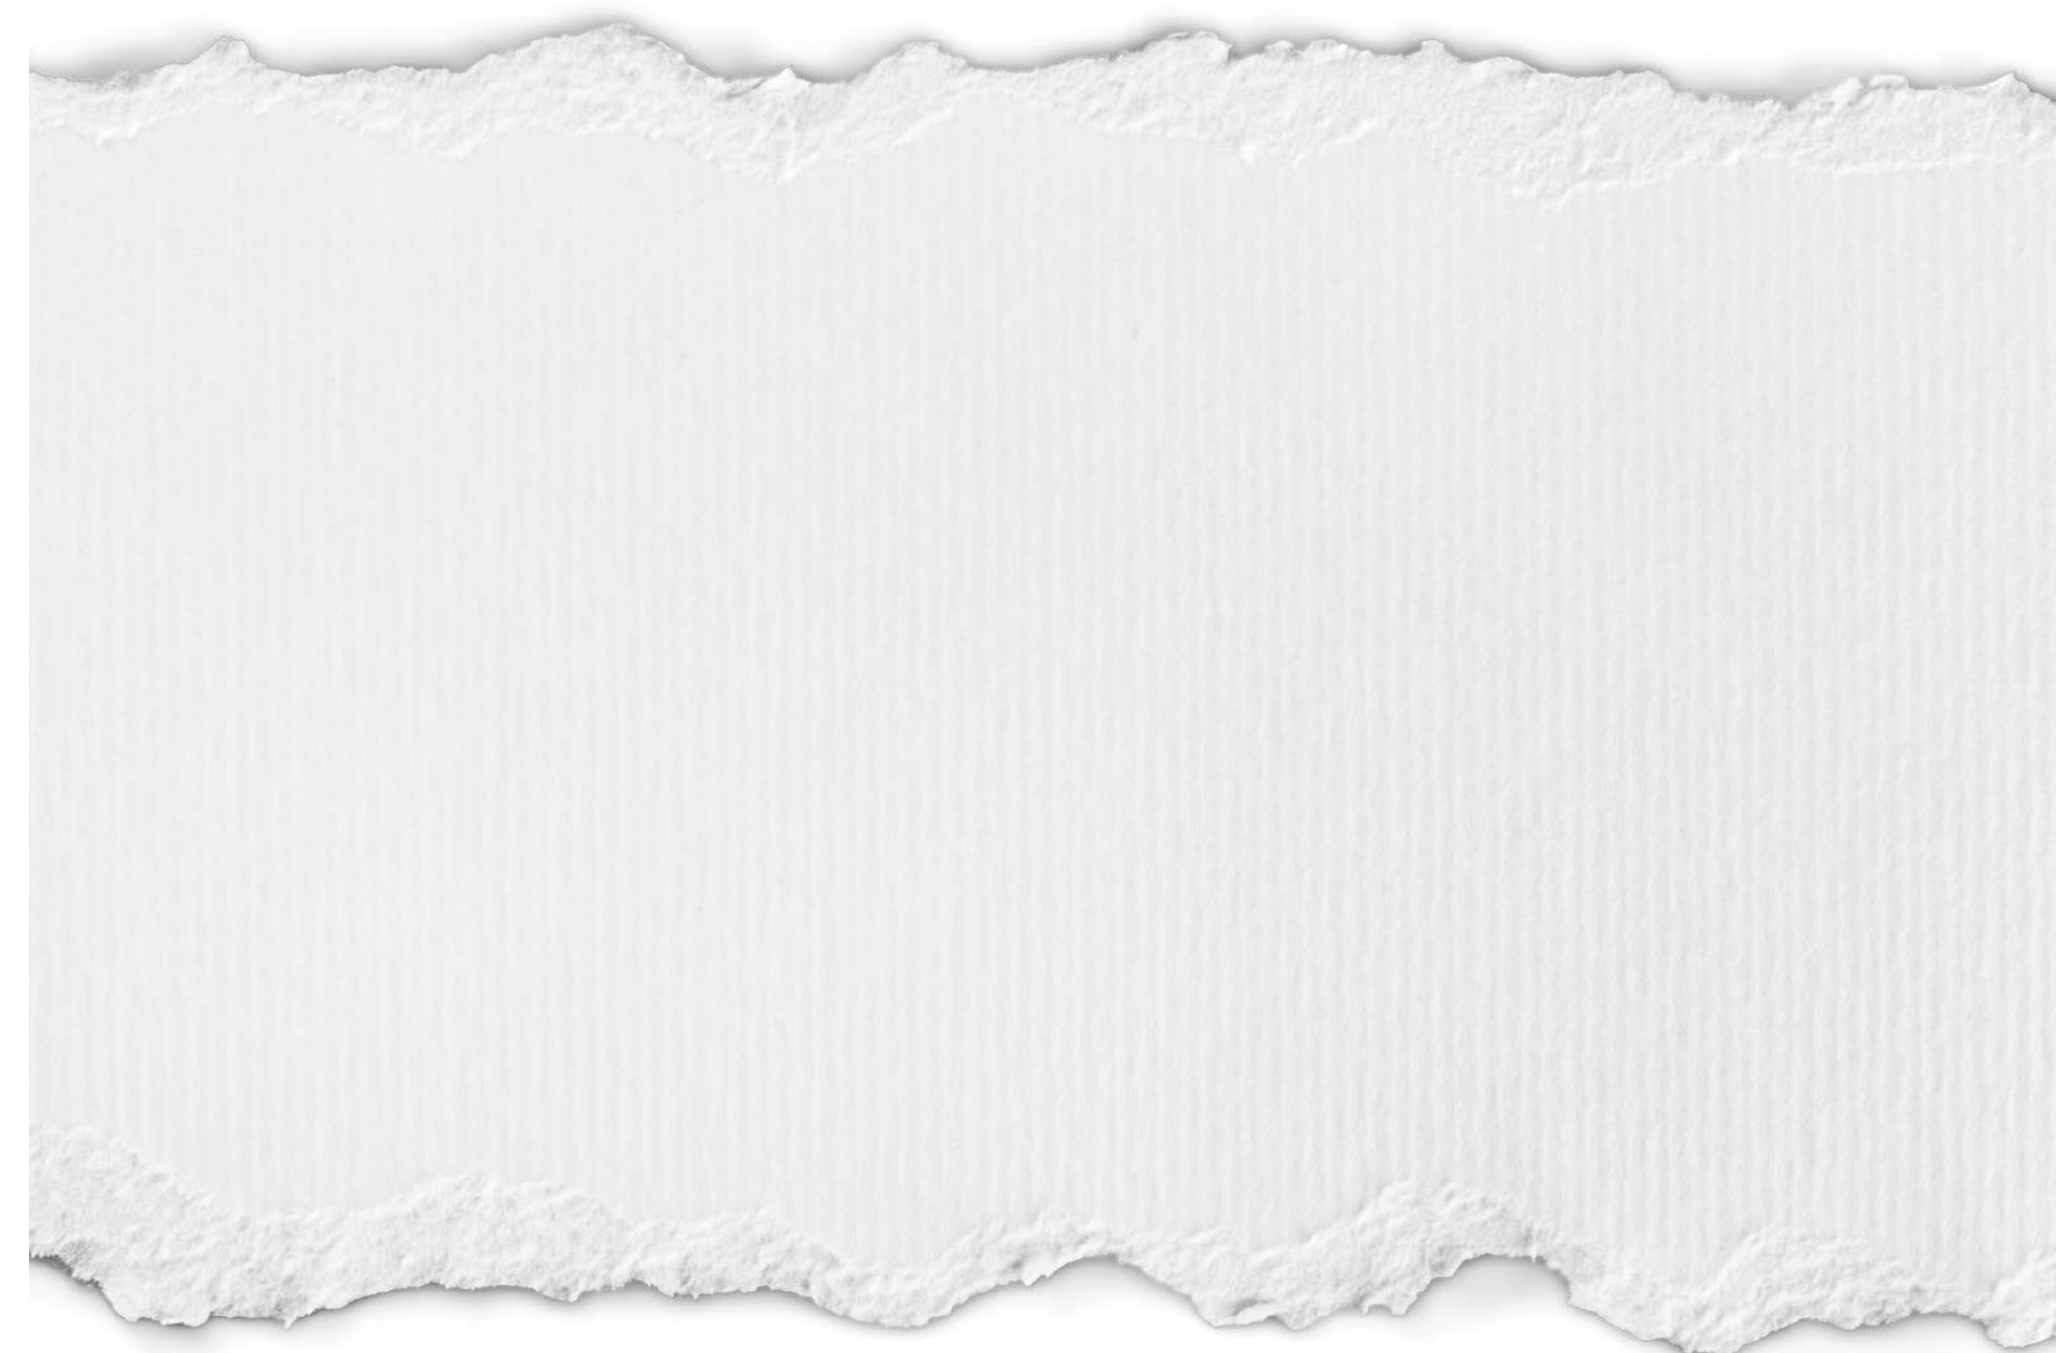

We know how important it is to stick to the budget and provide the necessary goods and materials on time. We focus on efficient sourcing through appropriate channels to identify and select the most competitive suppliers in terms of cost, time resources and the quality standard required.

Forest

Wood & Wood Pulp

We offer the complete logistics chain from tree to wood pulp. This includes transport, stuffing, sea freight, documentation and delivery to the destination.

Paper

We transport your conventional or containerized paper and work for the packaging and printing industry, as well as many other applications.

Industrial products

With over million metric tons of metals in the past years. We are one of the market leader in metal logistics. We take care of goods transit from & to anywhere by road, barge, rail or a combination. We ship and receive in break-bulk and container. Imports originate from China, Turkey, India, Taiwan, Brazil, Korea and others. Additionally, we discharge about 1000 containers per year in dedicated warehouses. Thanks to our many years of experience, we can offer exclusive deals with all handling terminals, one of our dedicated cargo surveyors checks on the good the moment a ship arrives. Once the goods have arrived, we take care of your goods transit to anywhere by road, barge or rail.

Glass & Chemicals

We organize the full logistics flow; covering pre-carriages, sea freight and document handling for hazardous and non-hazardous goods. TZD Global is an expert in offering smart solutions to meet both local and global needs.

We have more than decades of experience in the management of both import and export flows of building and automotive glass. We take care of the coordination and assist you with your projects.

Oils & Lubricants

We have worldwide service hubs at all main chemical clusters, where our staff takes care of your logistics with a specific expertise in flexitanks, ISO tanks and Packaging.

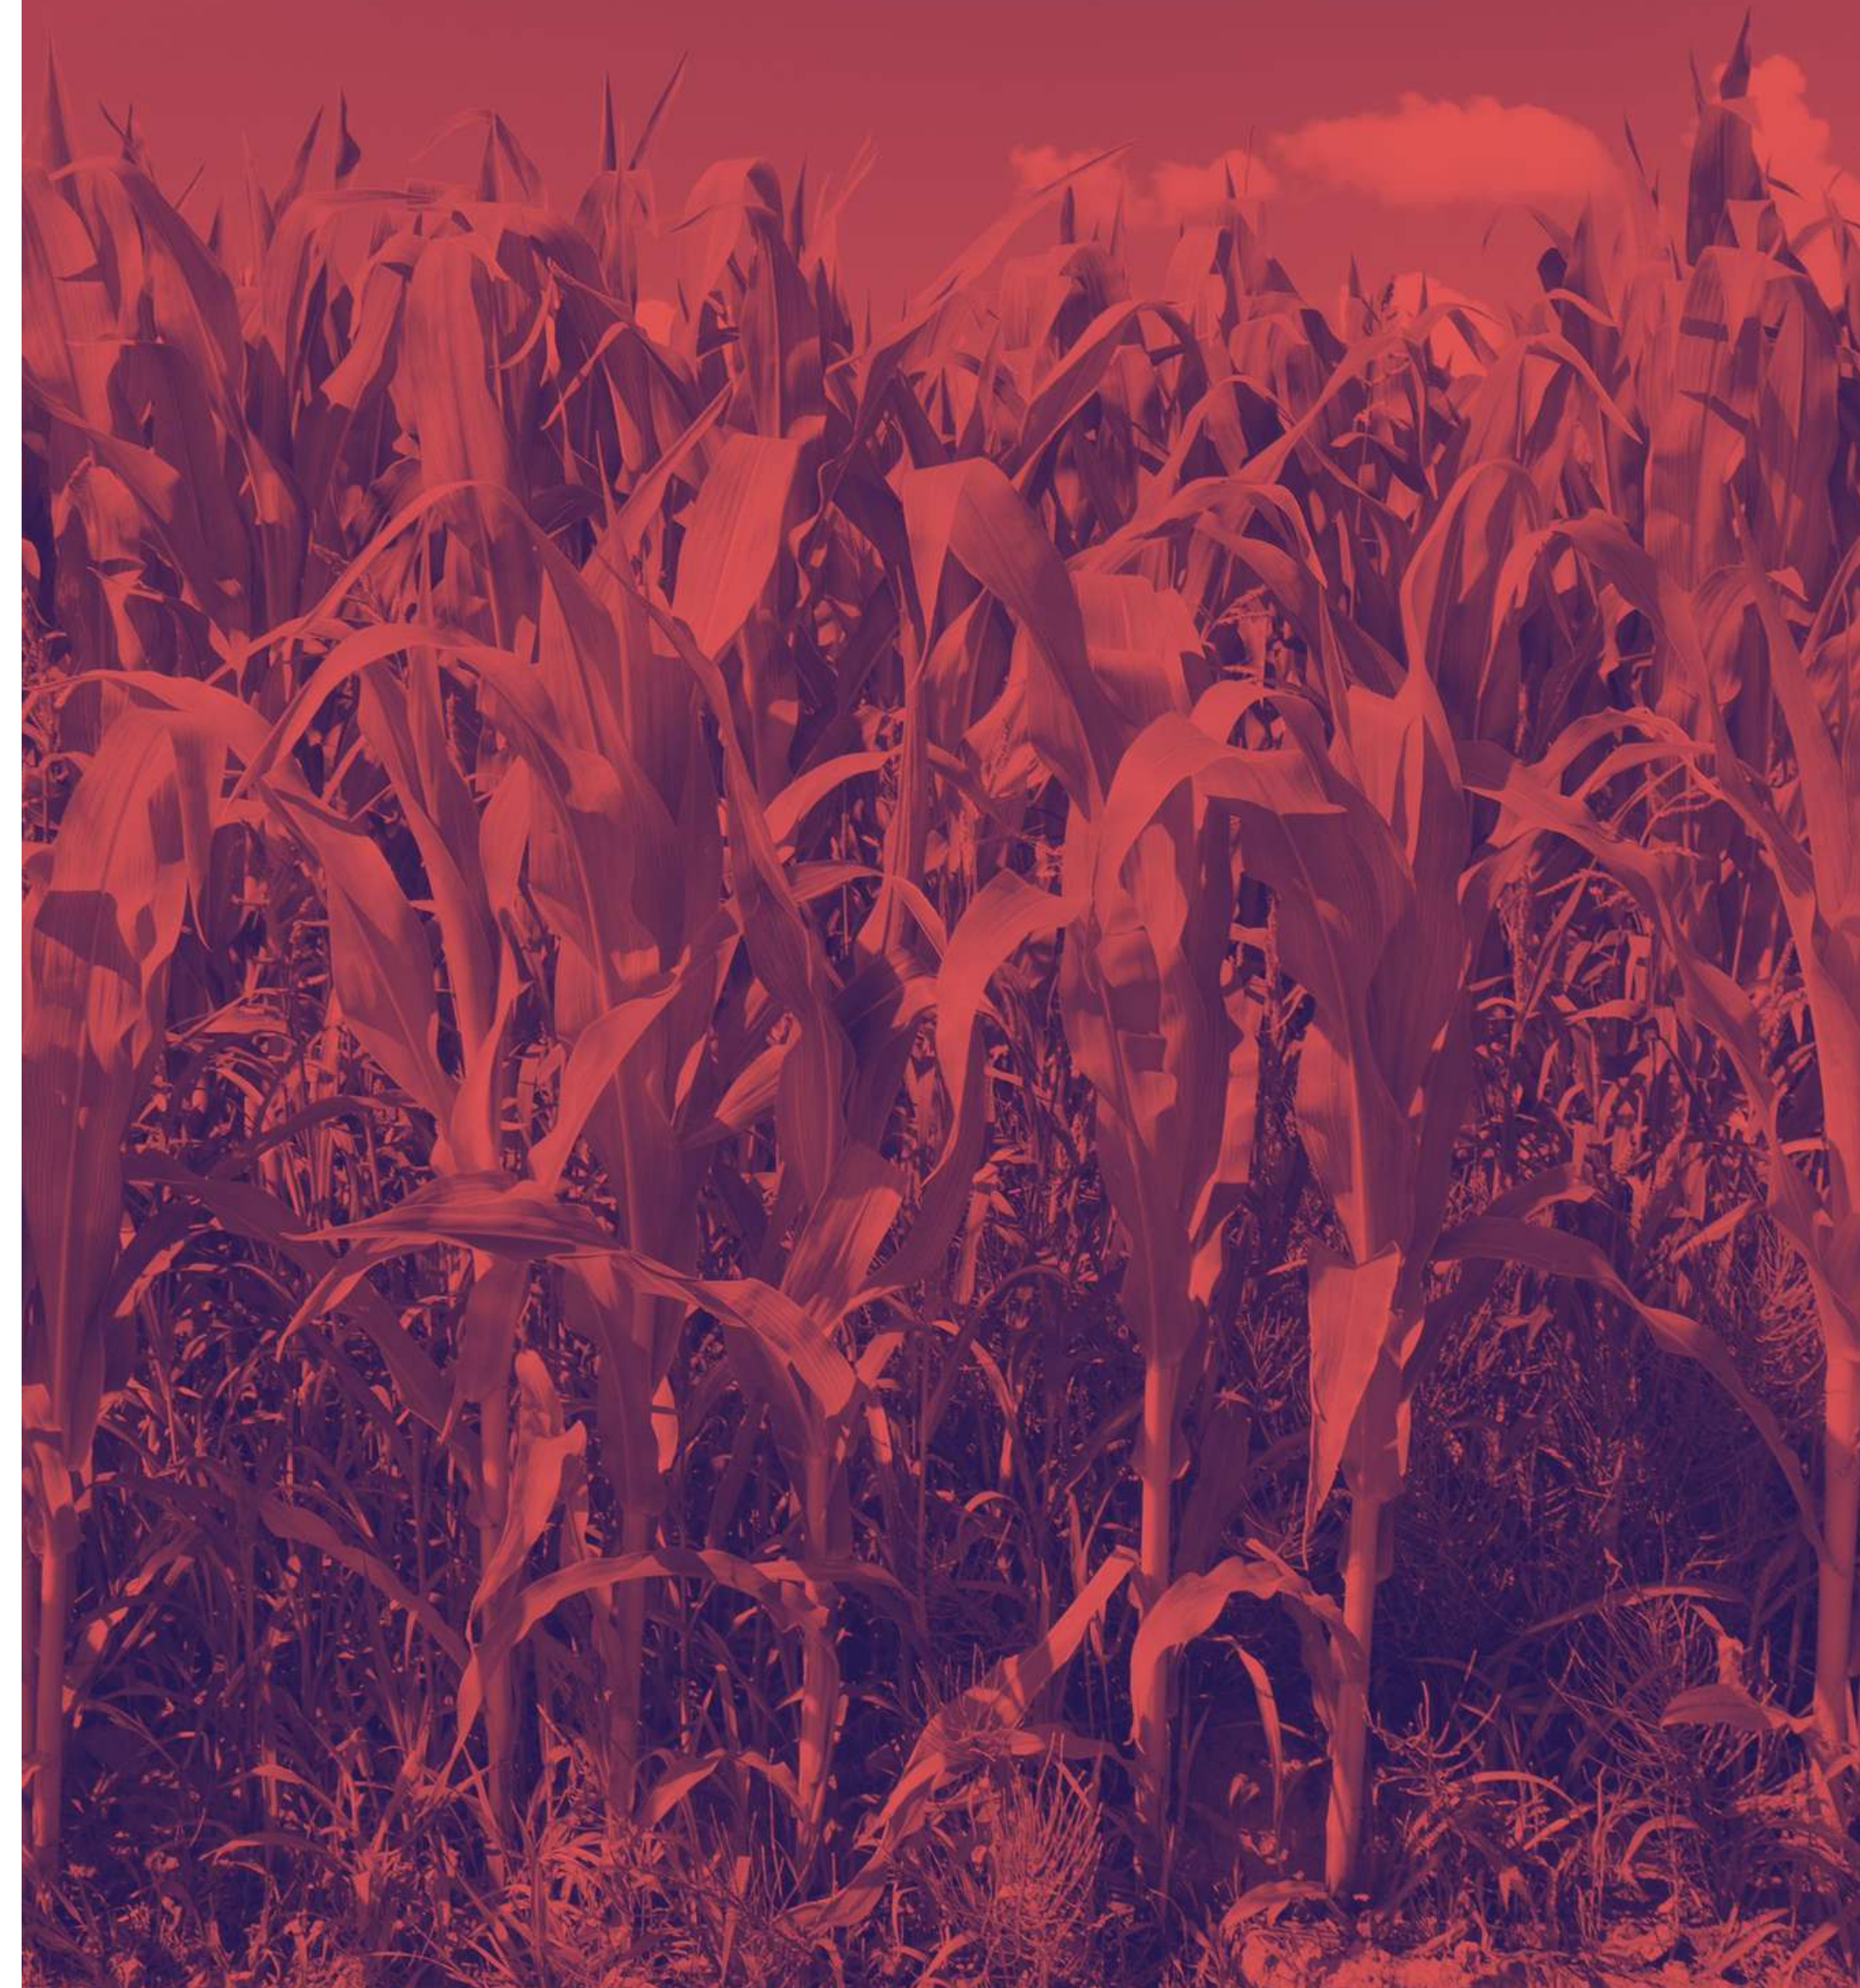

Project Cargo

Oil & Gas field equipment's, windmill parts we transport internationally, which includes the pick-up in factories overseas, sea transport, on-carriage and delivery to the production line. Any oversized or special cargo can be moved by our expert team.

Agricultural products

Food

Both ambient and temperature-controlled foodstuffs are handled by our specialized team. We have storage facilities available inside and outside the Eurports Group.

Sugar

Together with Euroports sugar terminal, we have a competitive advantage lying at the heart of the European beetroot production; the port of Antwerp. You can count on us for integrated sugar logistics as an in-house forwarding company. We are at the heart of European sugar export. During the previous campaign, over 1,000,000 tonnes were handled by our dedicated sugar team and were exported from different inland production plants and distribution hubs. We act as an independent party towards producers, trading partners and logistics service providers. With our knowledge, experience and network, the blueprint of the TZD Global sugar operation has been copied to the international market. TZD Global also focuses on the incoming flows of exotic sugar across any continent and can organize the transport, storage, handling and inland distribution of certified organic sugar.

Fertilisers & Minerals

We work for several large fertilizer producers and traders, distributing their products all over the world. You can benefit from a specialized fertilizer terminal with large storage capacity, which can be used for bulk, big bags and pallets. We enjoy perfect accessibility to road, rail and waterways.

Thanks to our many year of experience working for the mining industry, we are able to guarantee our clients the best logistics solutions.

Logistics Services

—“

We transport goods by vessel, plane, train, truck or any combination. For your liquid products, we ensure a flawless flow.

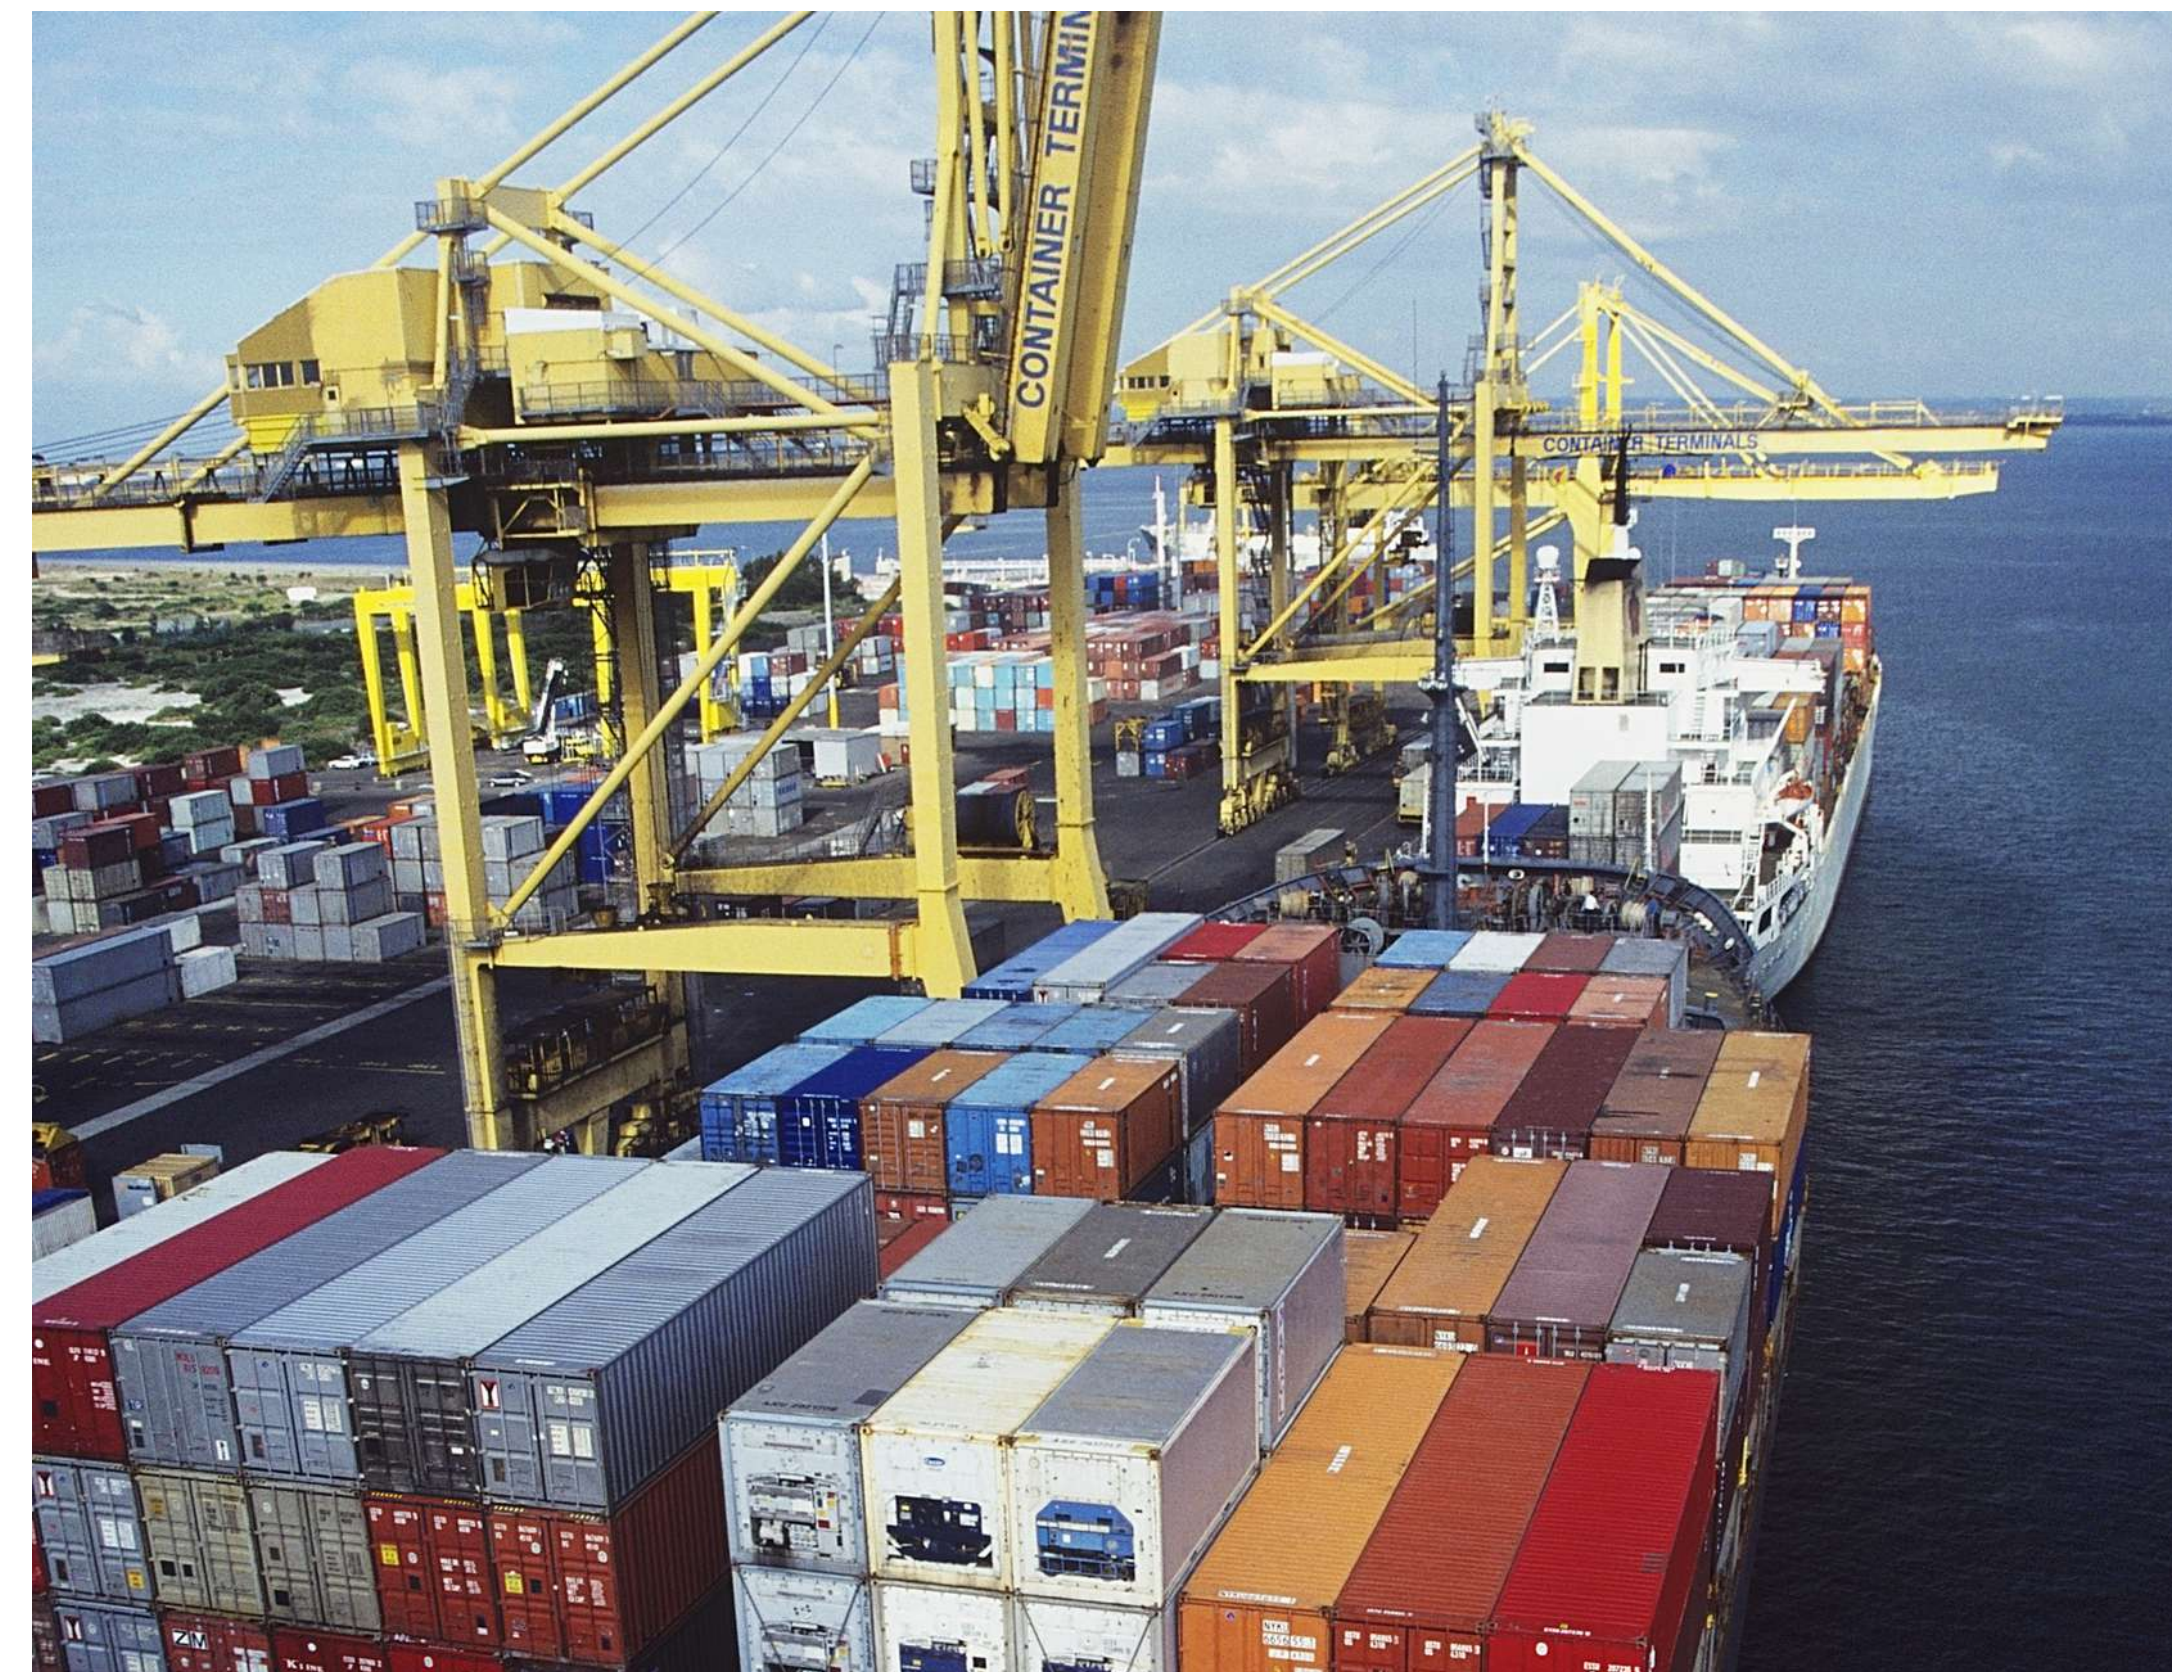

Take a look at our services :

—”

Ocean freight is the core of the TZD Global logistics services. We have unique partnerships in place with global and local carriers. Additionally, we provide full reporting services and shipment follow-up.

Air freight

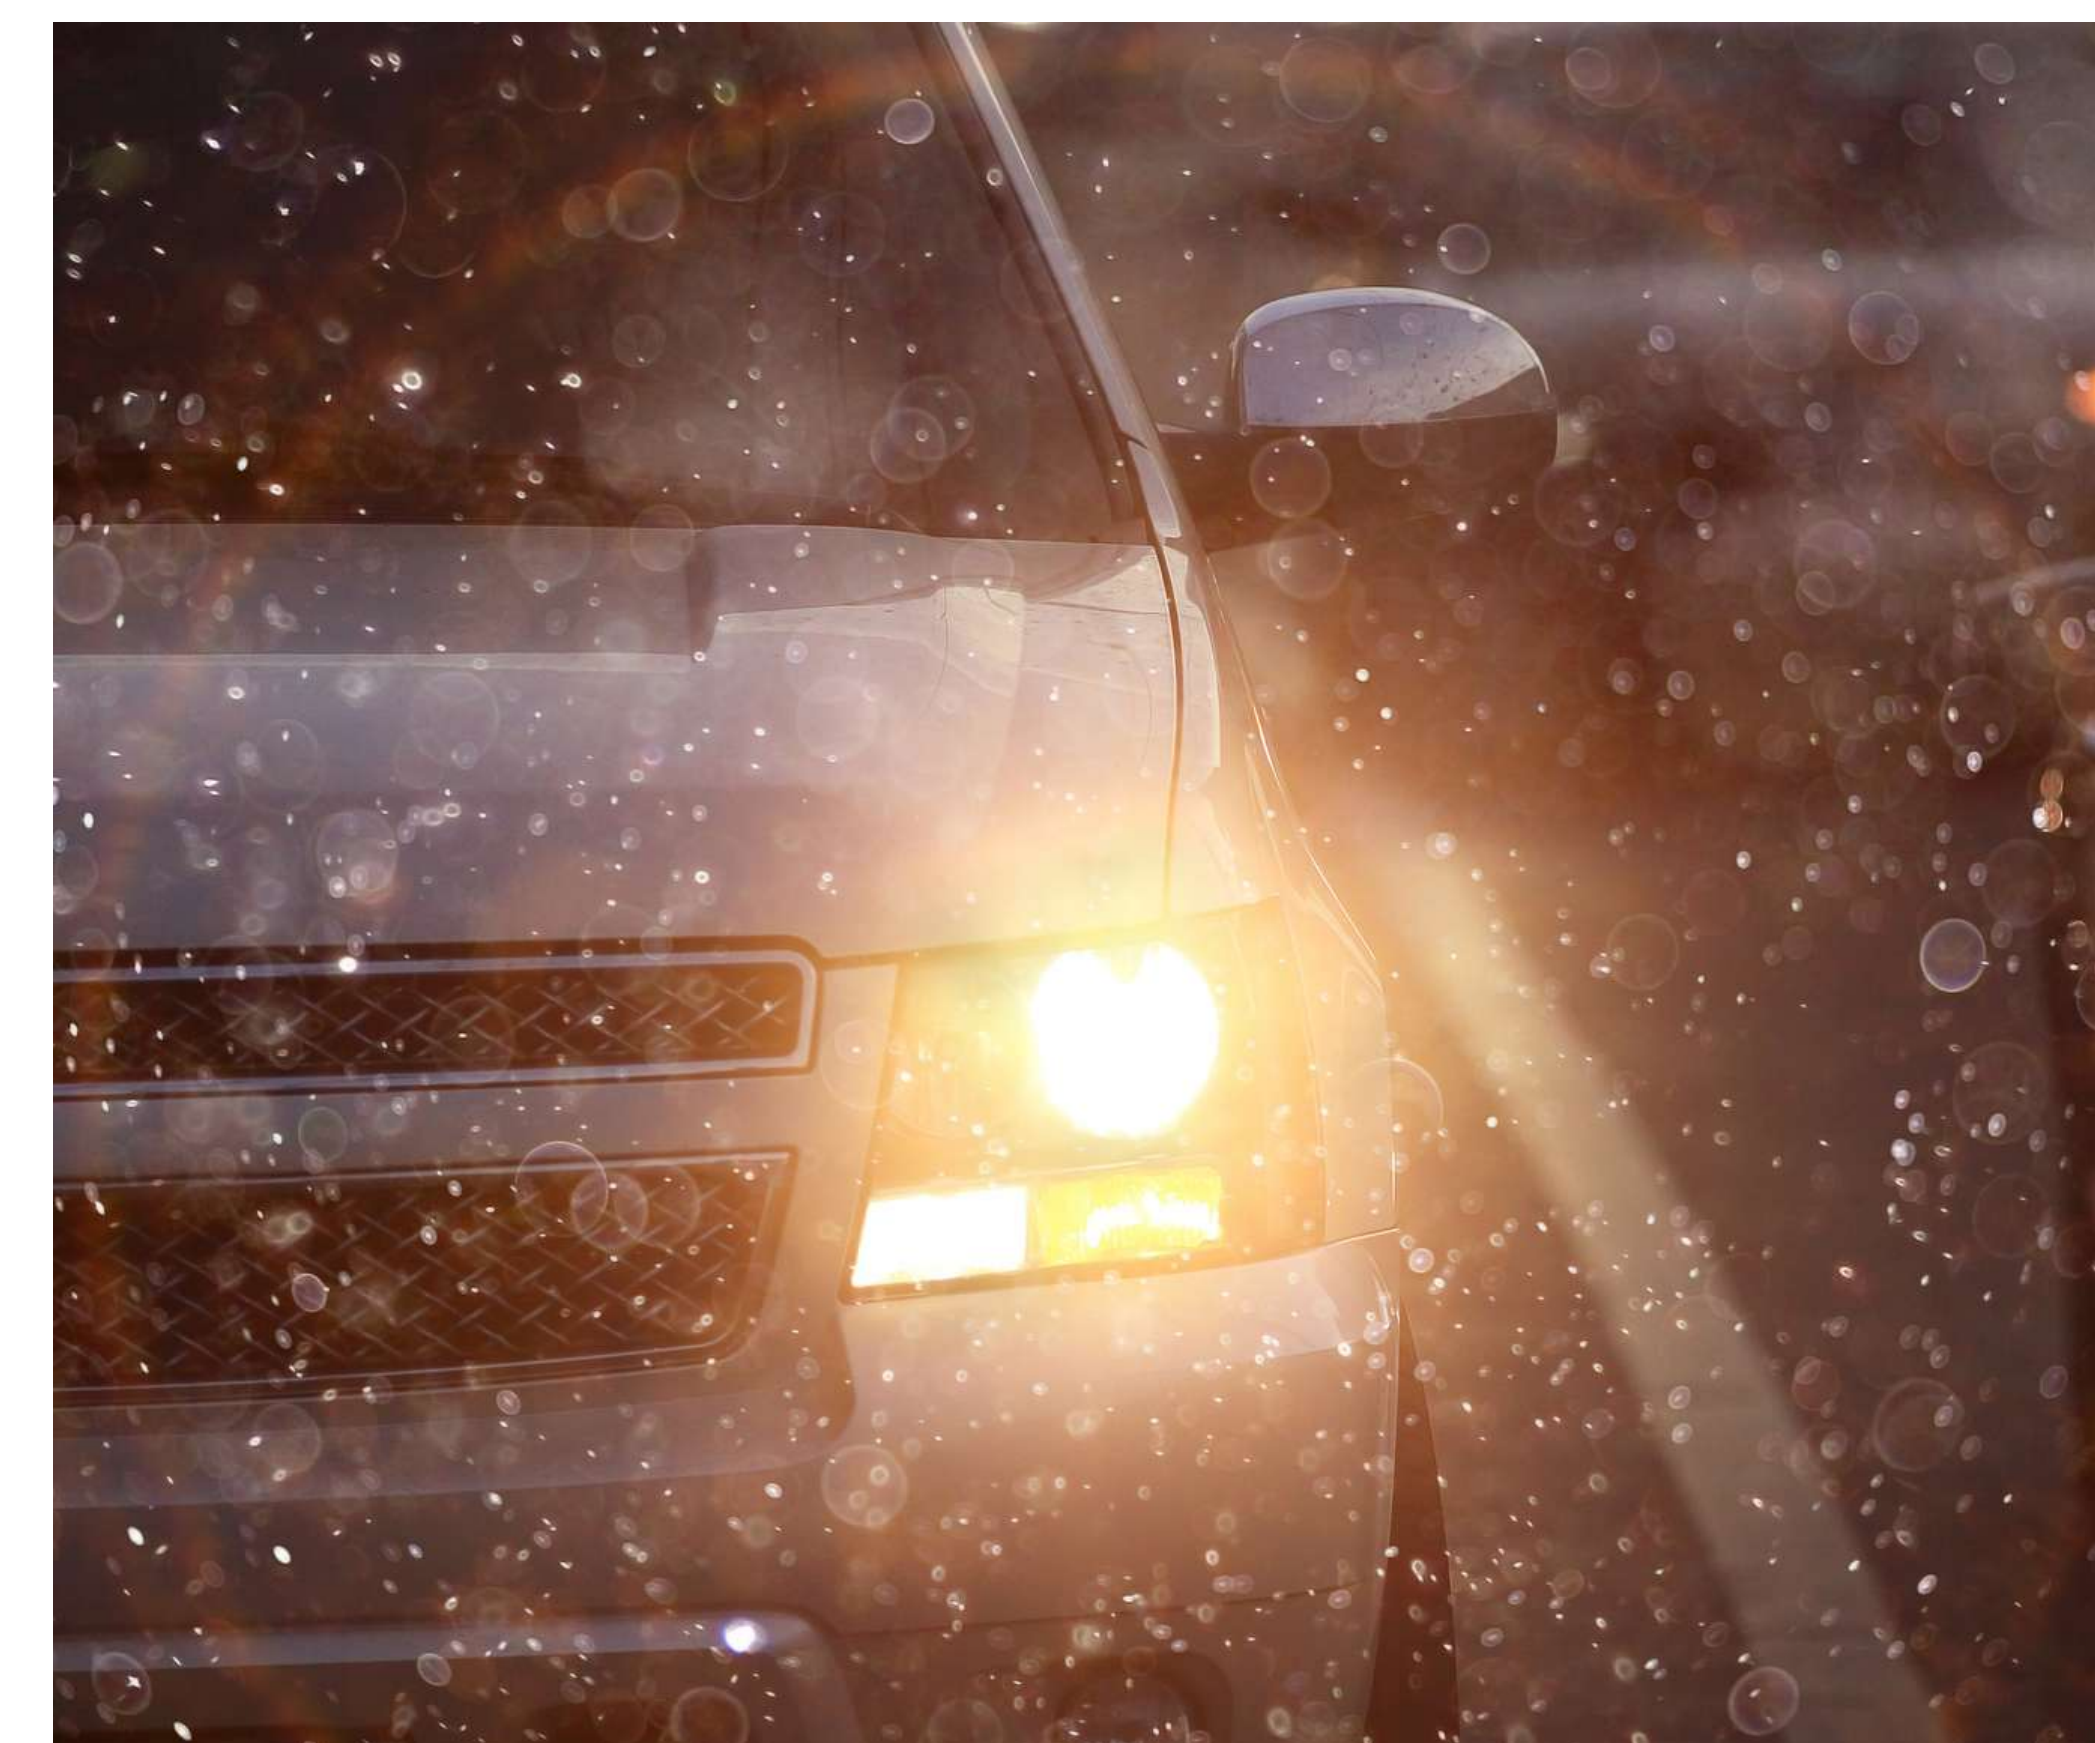

We offer 24/7 airport-to-door, door-to-door and door-to-airport services. For airport-to-airport we rely on the fastest and most qualitative possible airfreight solutions, offering both express and BXO services. If safety precautions are desired an on board courier (OBC) and aircraft on ground (AOG) solution can be arranged for chartering, we propose both full and part-charter services.

Road Transport

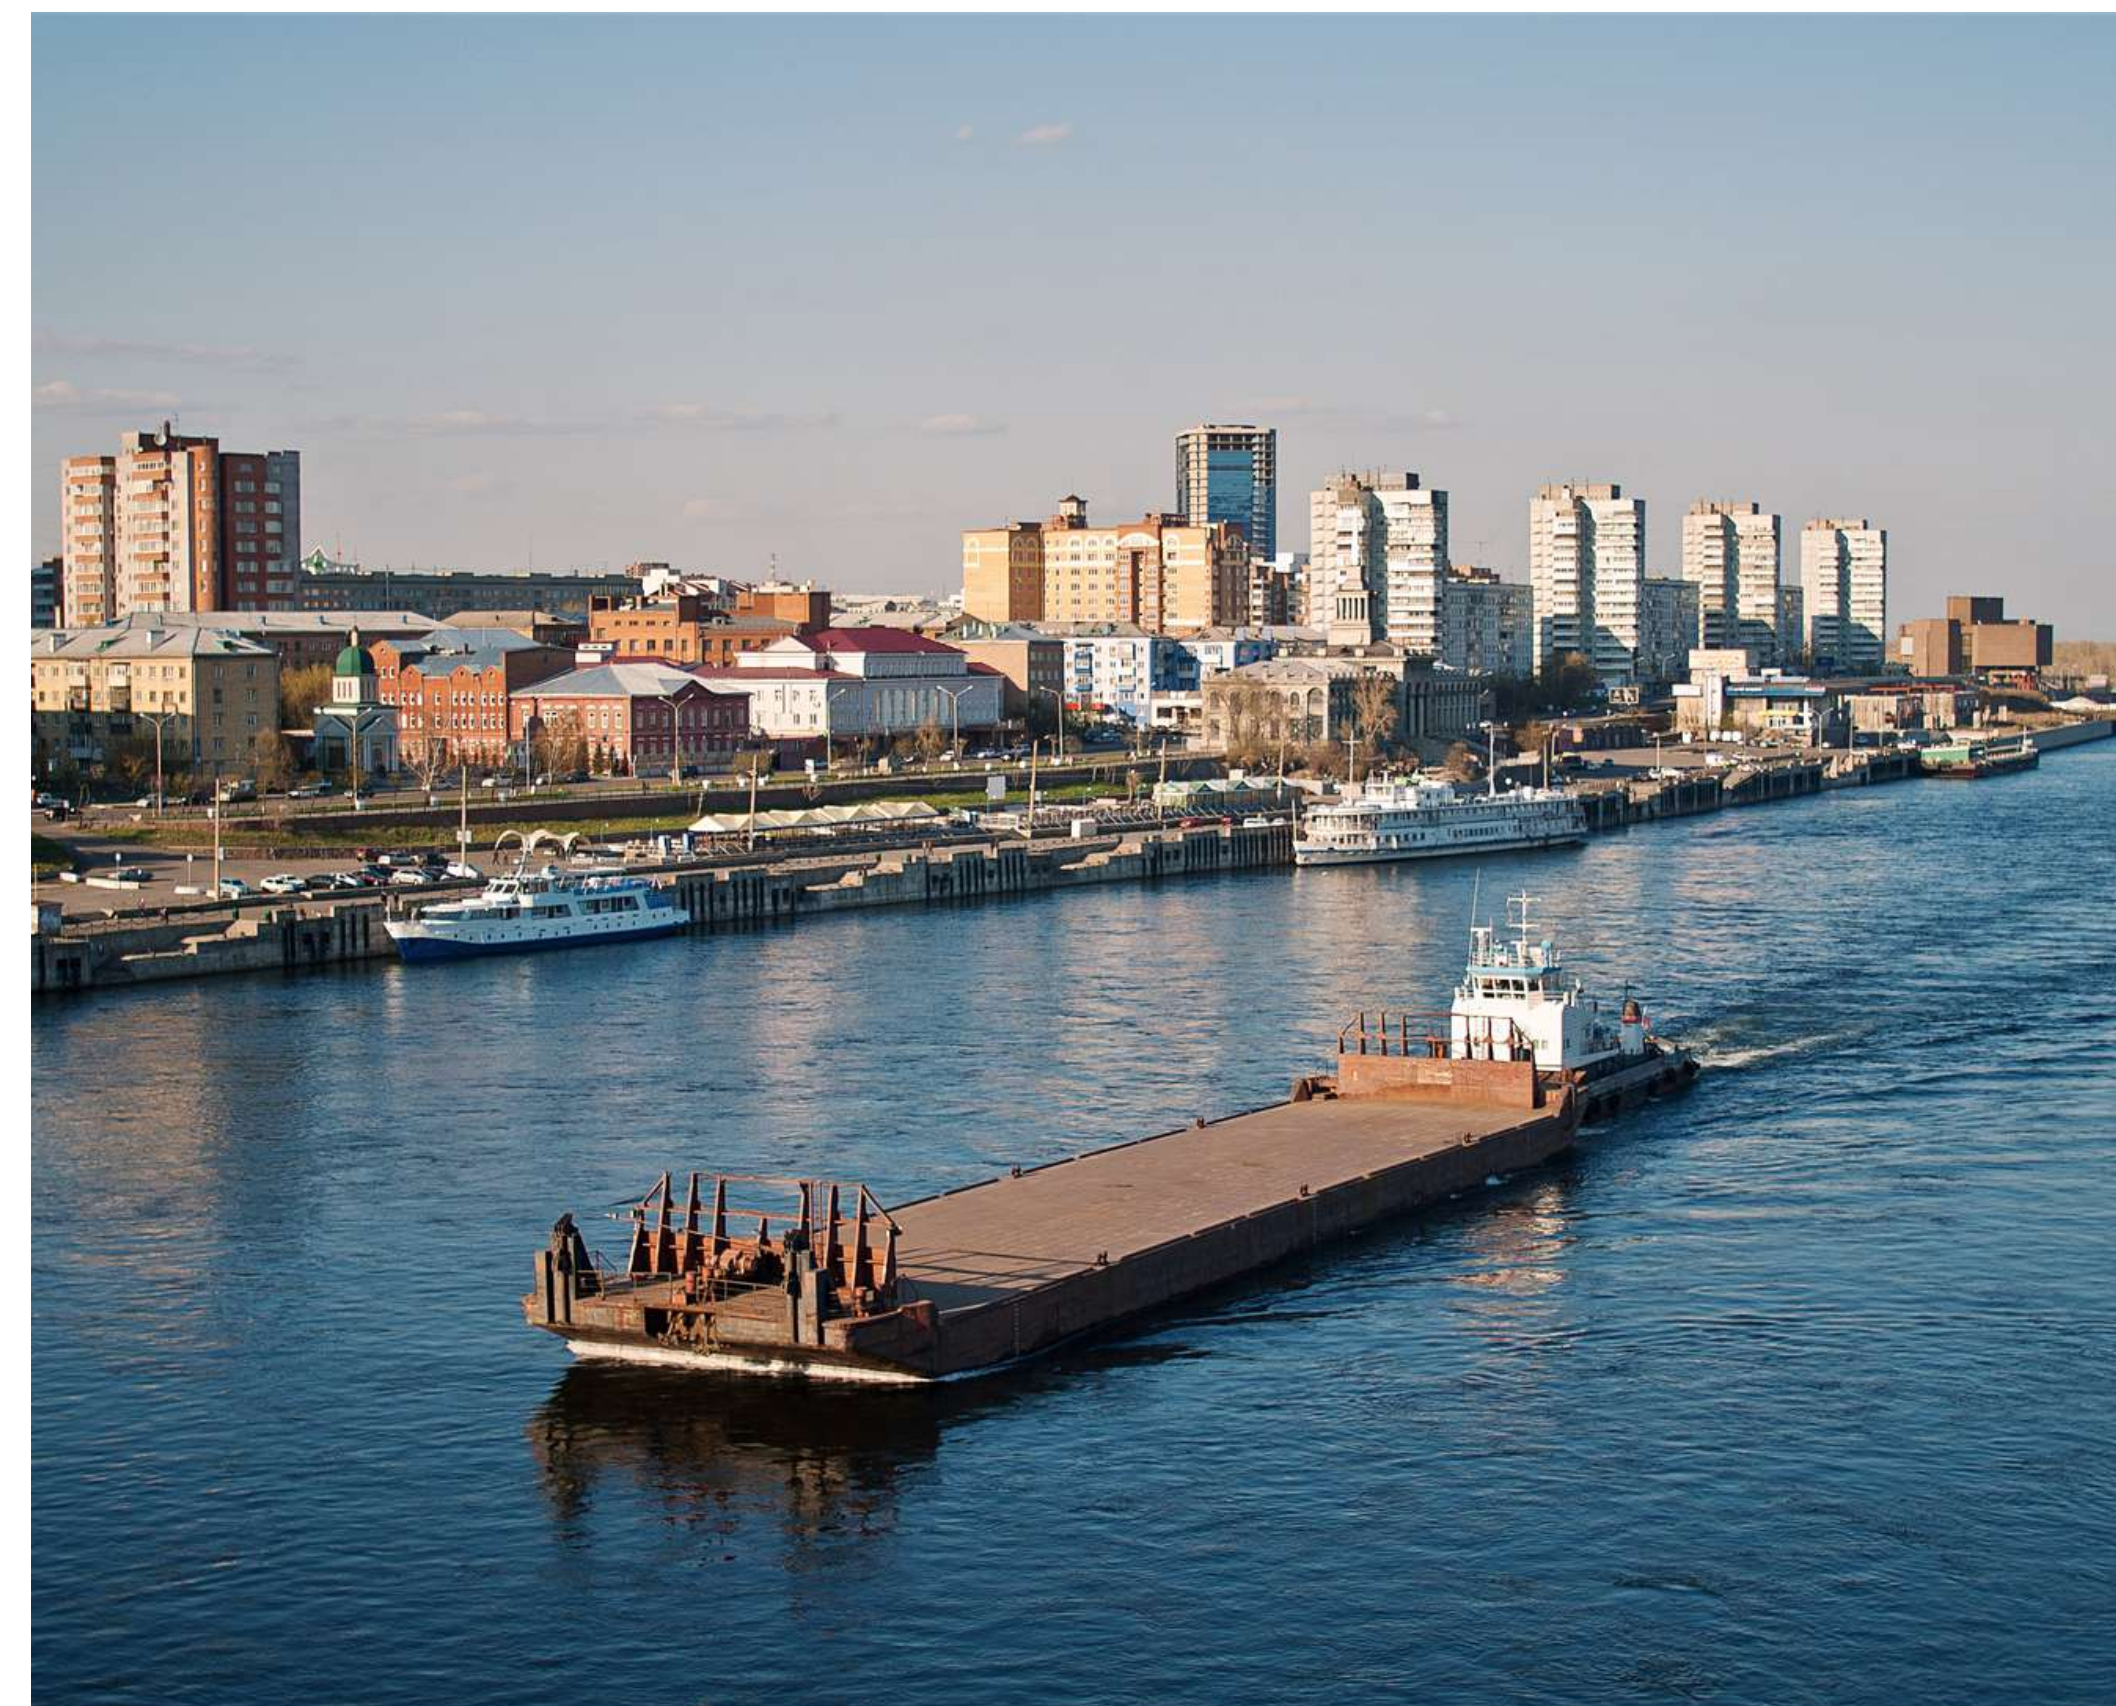

In Middle East, we have over 50 experts delivering your products by truck to their destinations. Globally we are able to offer solutions for all transport modes: conventional, bulk, containers and multimodal.

Barging

We cover all continents inland waterways and ports with our vast network and our team of experts. All kinds of commodities can be transported by water: bulk, break-bulk, exceptional pieces, containers and pallets

Full Service Solutions

Tender & Procurement Services

Our procurement team supports you on tenders, in a #PL, \$PL or direct account (BCO) concept. We have a well-designed format adapted to your needs. We can guide you in establishing the maritime transport budget, preparing supplier meetings, data management, setting-timelines to conduct negotiations, and assist in the further process up to the final nominations and carrier evaluation.

In-House Customs

Our different offices work with dedicated external or internal licensed customs brokers, who handle all customs files efficiently and expertly. We provide consultancy to set up your customs flow as smooth and cost efficiently as possible and besides import, export, transit handling, we also organize fiscal representation, inspections, cargo checks, surveys etc.

(Re)-Packing

We have two different ways of handling (re)packing. Firstly, we handle chemicals, oils and lubricants from bulk to packed and from packed to bulk. Secondly, we take care of projects and industrial packing as well. With great experience in breakbulk and OOG (out of gauge), mostly for the oil & Gas industry.

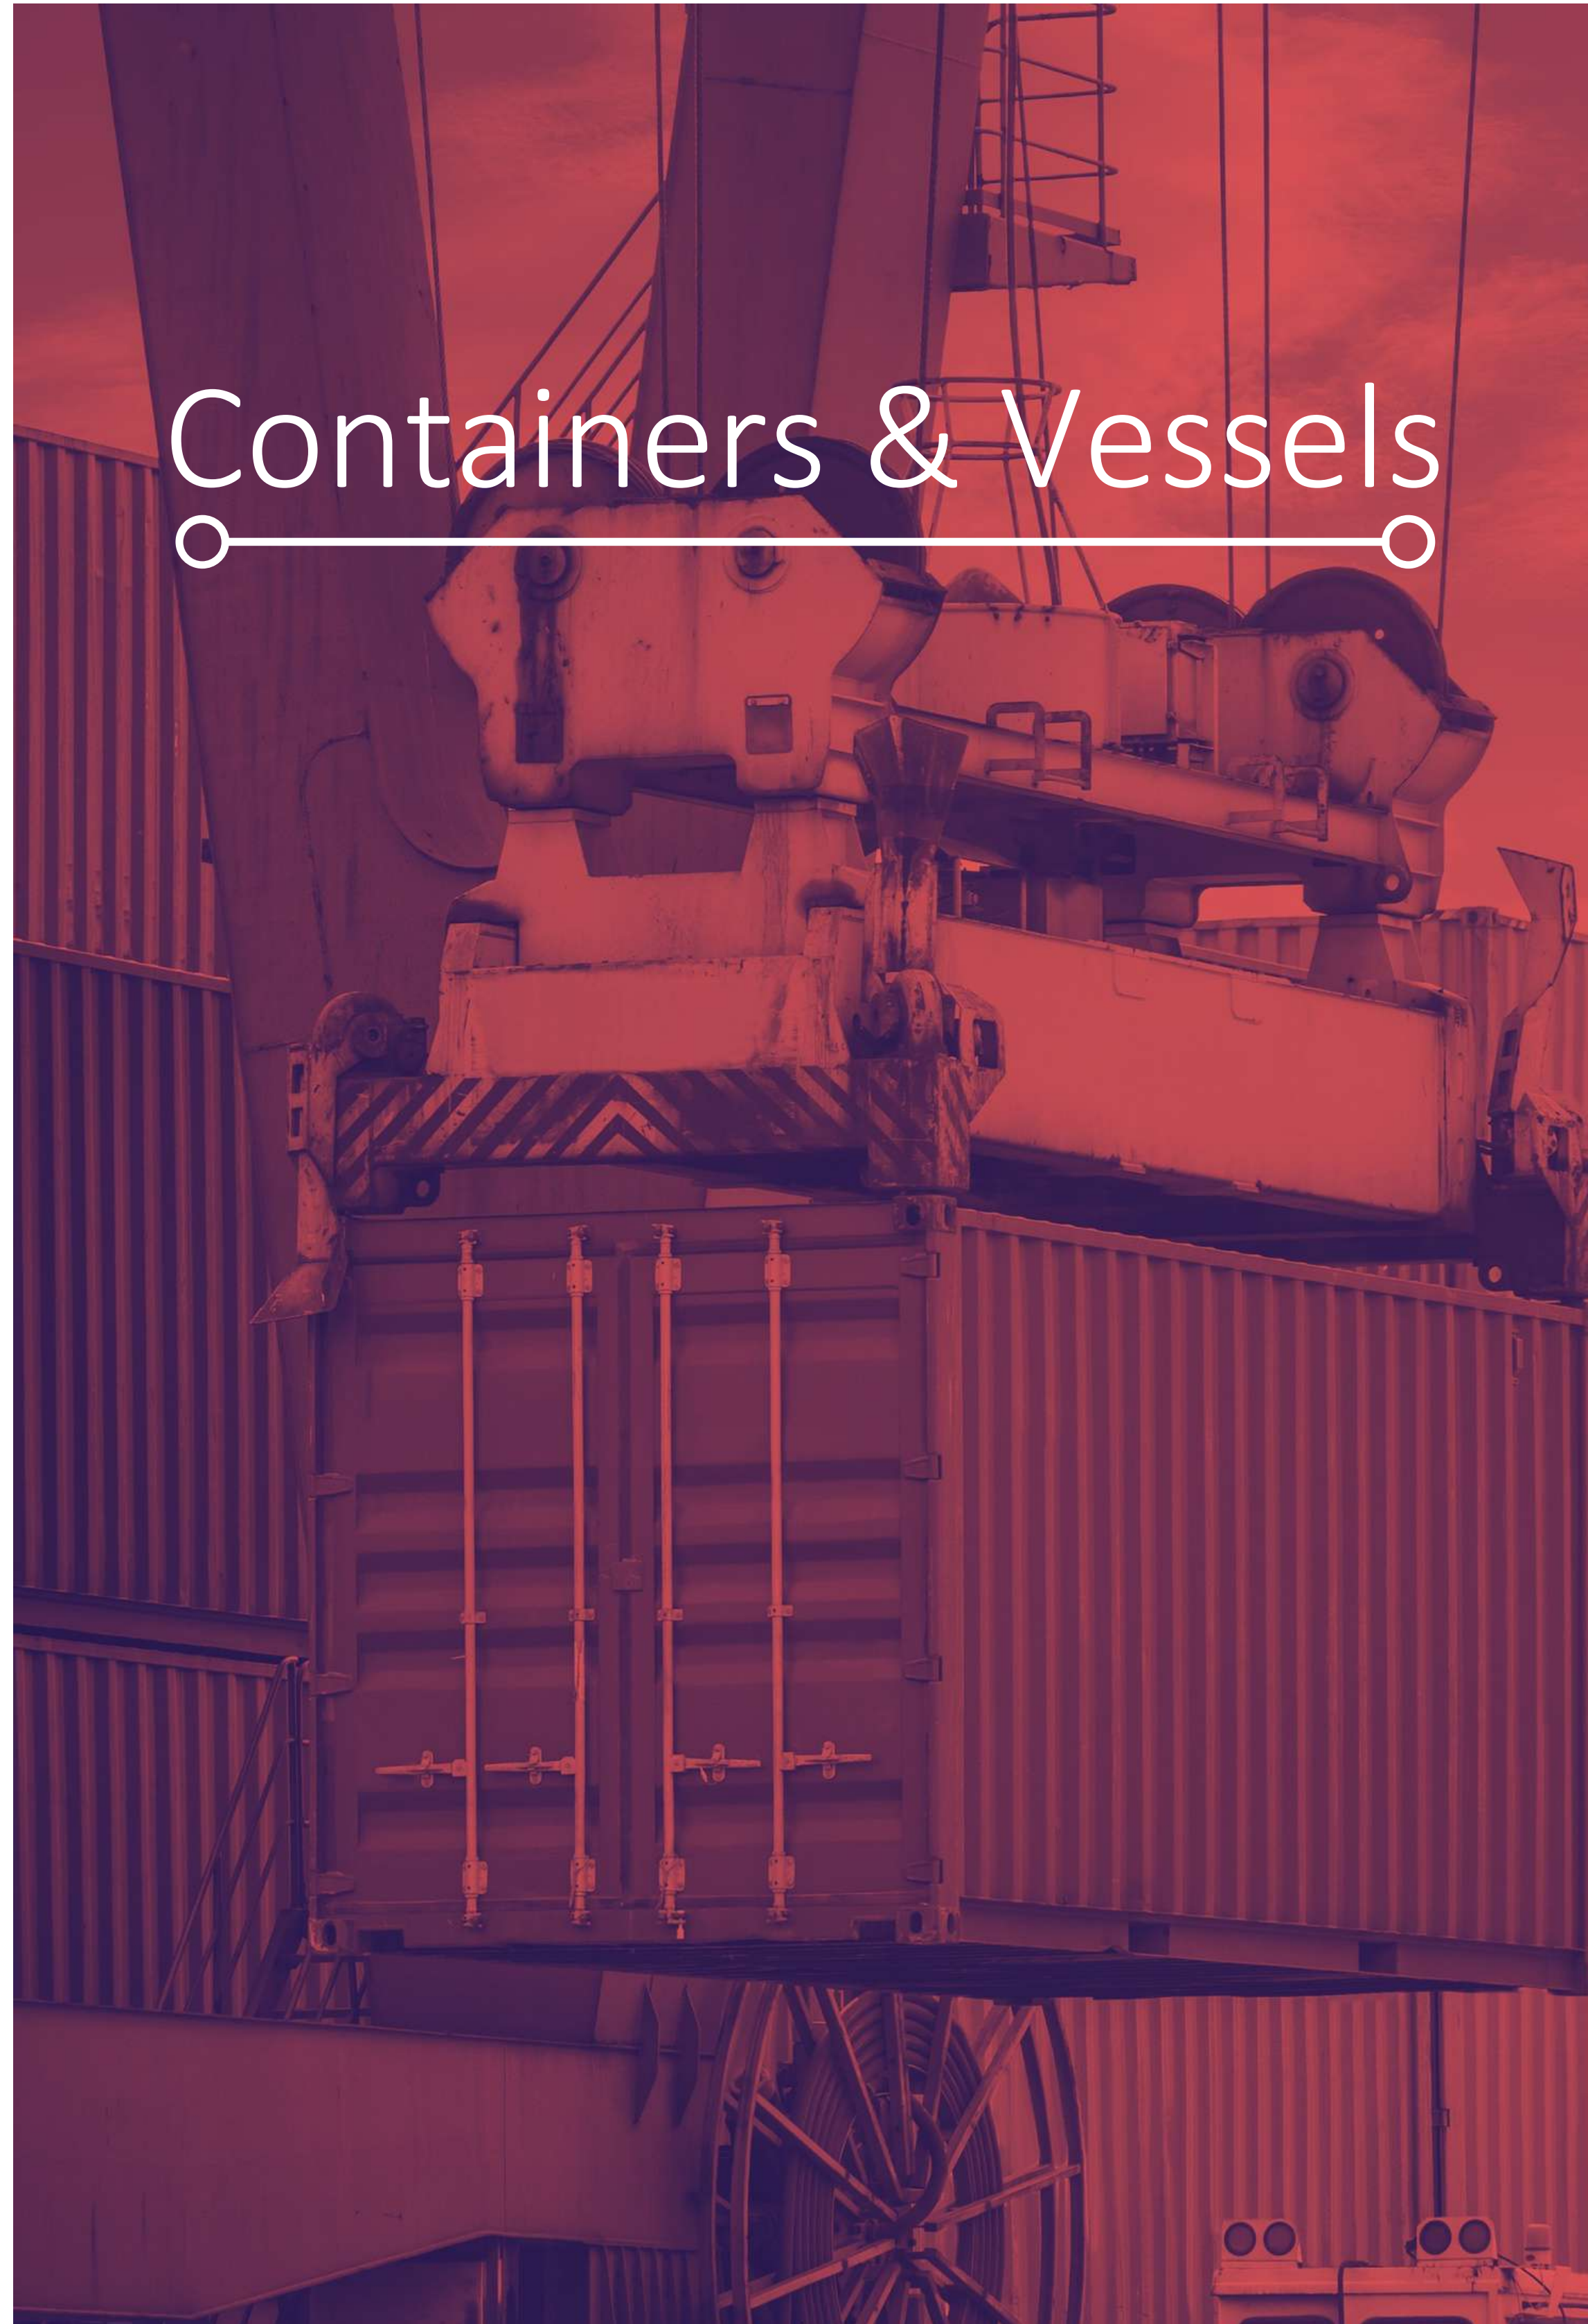

Storage & Warehousing

We work with different internal and external partners and as a neutral party we advise our clients regarding storage and warehousing facilities

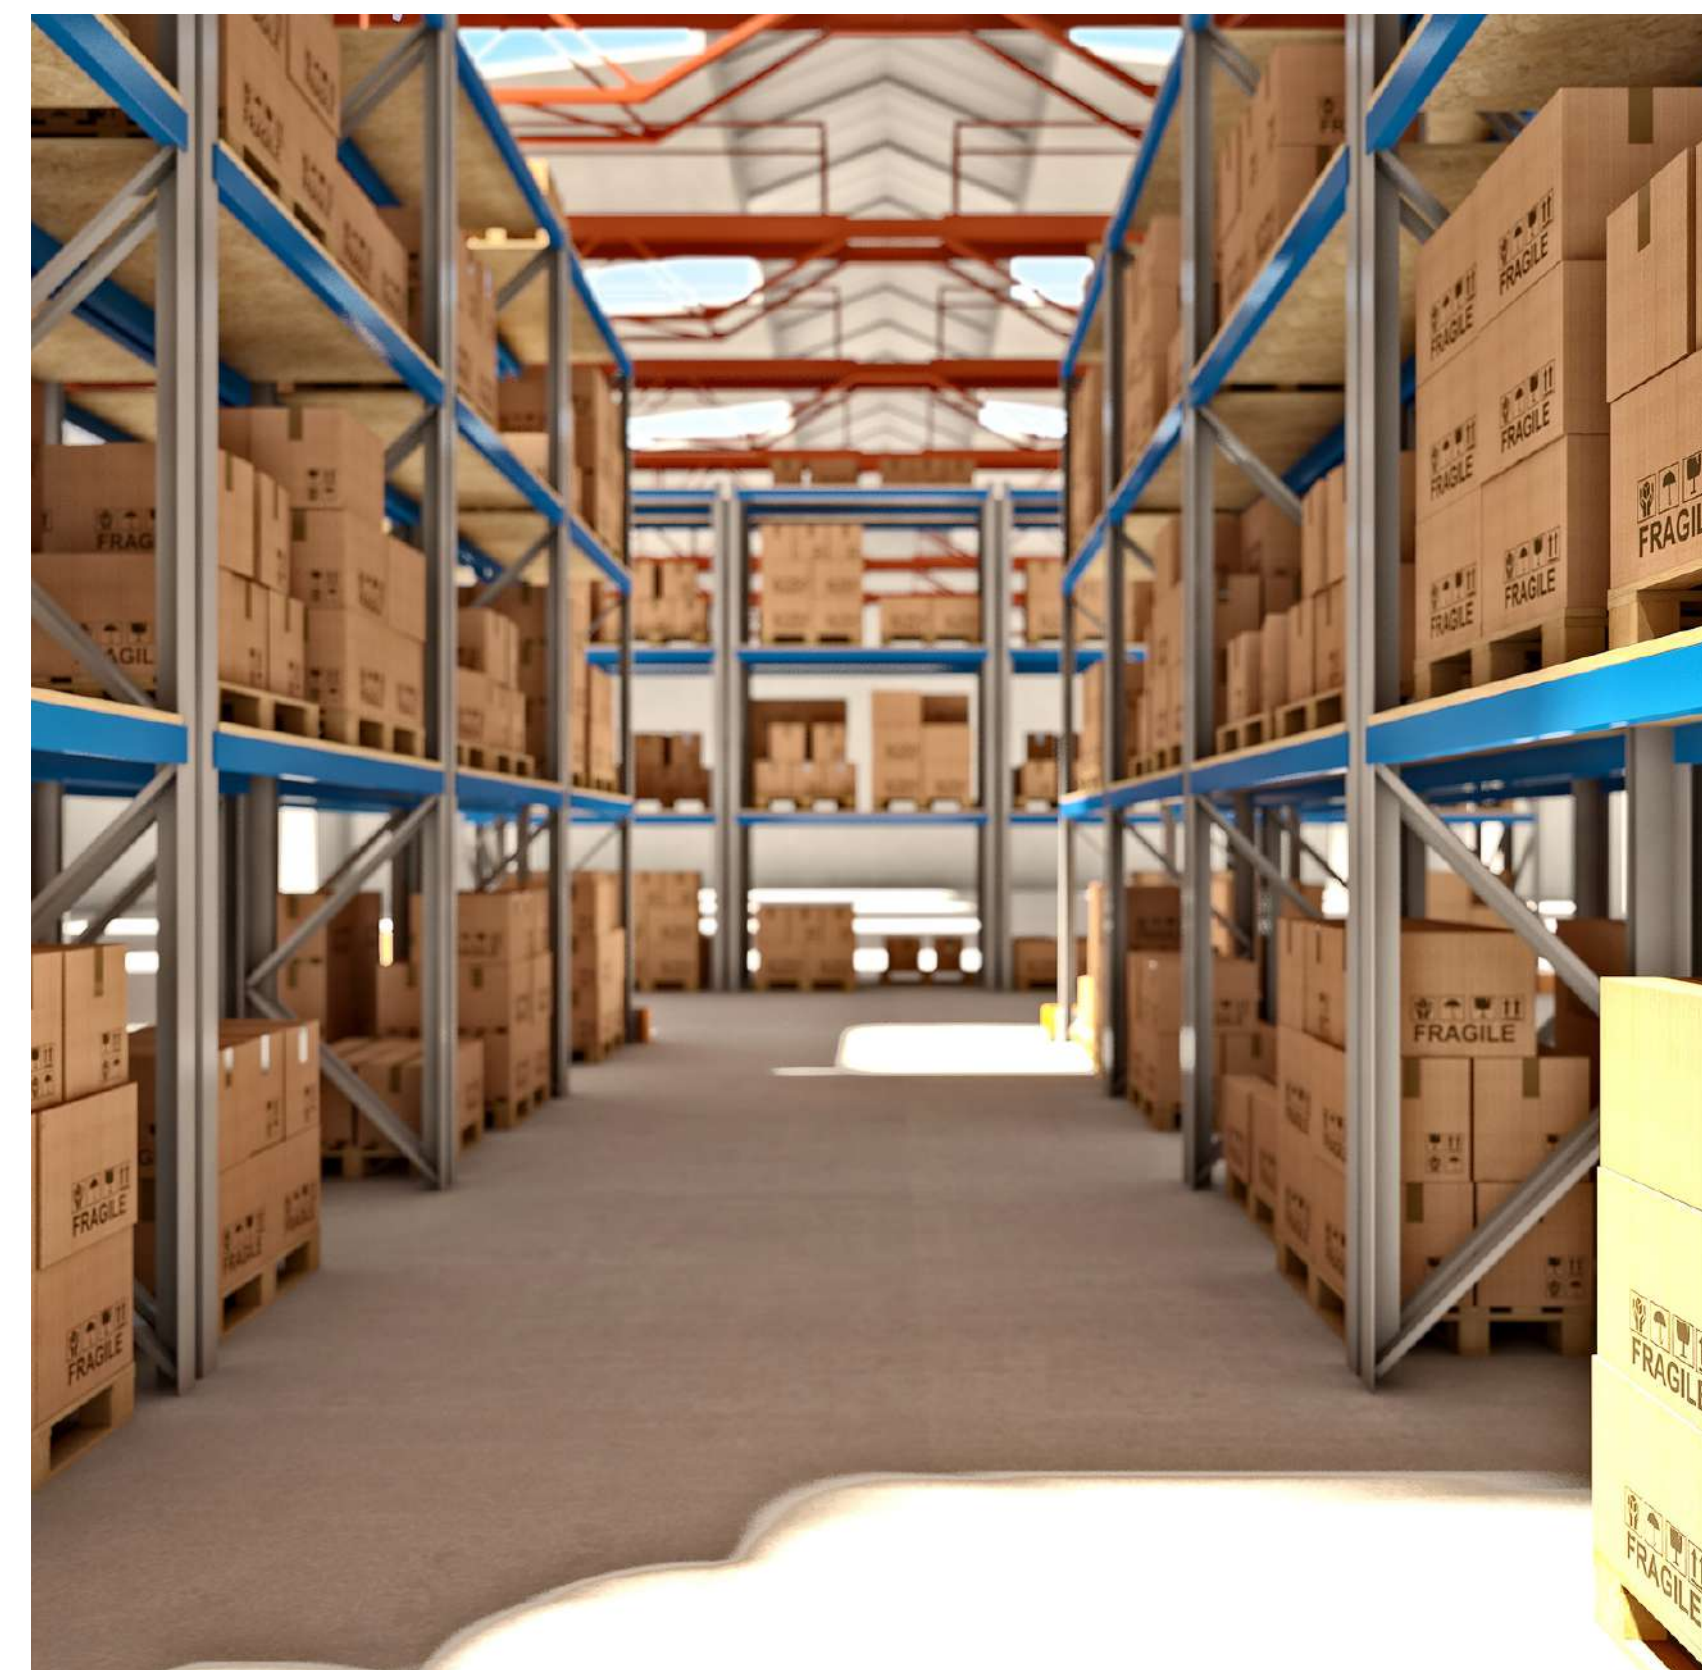

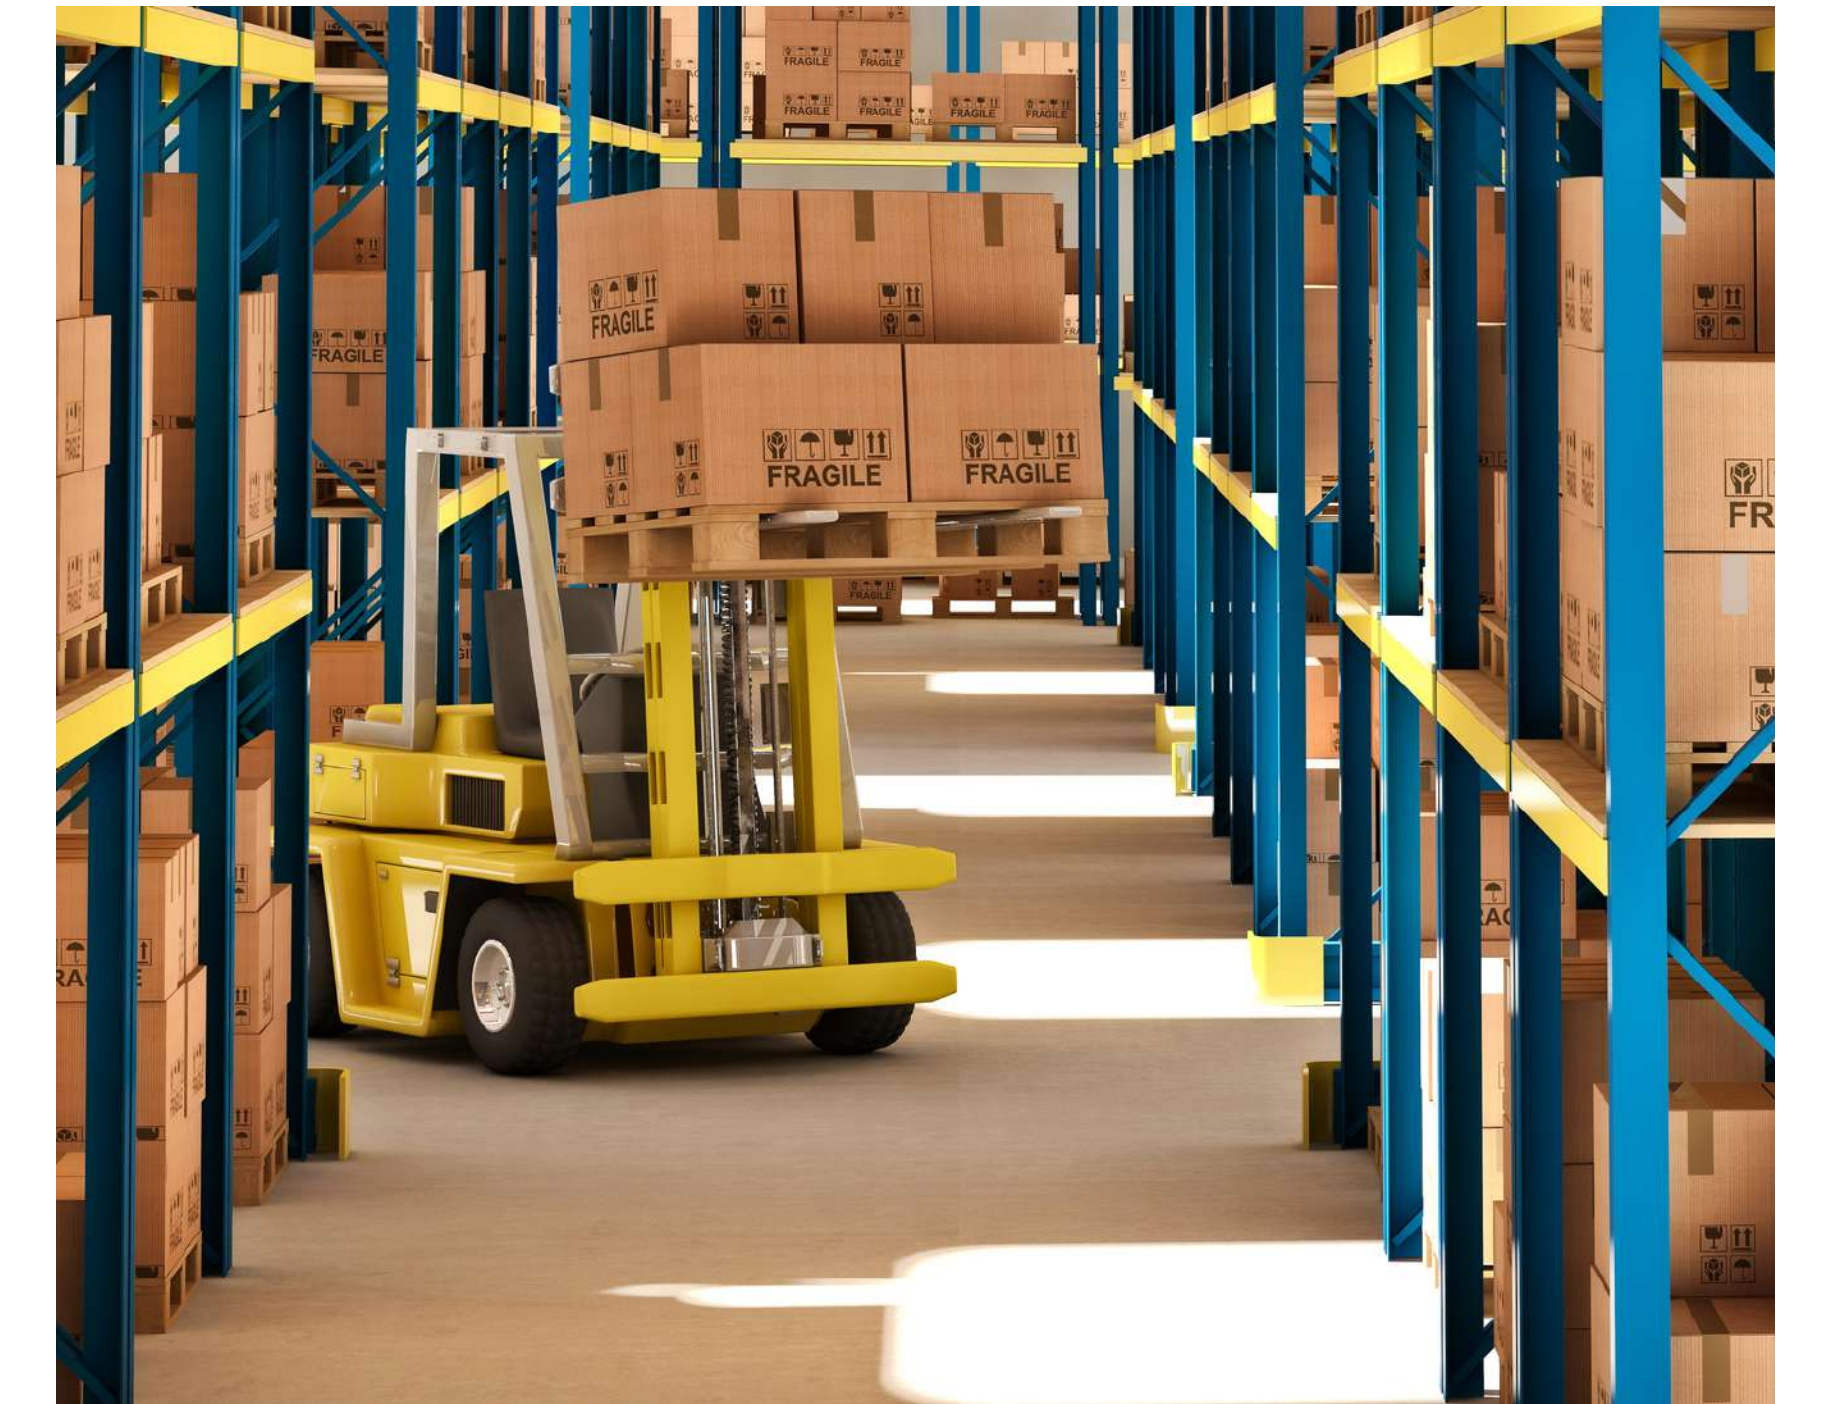

Containers & Vessels

Stuffing & Stripping of Containers

We offer dedicated warehouses for stuffing metal products. As an independent party, we have the advantage of arranging competitive deals with warehouse providers.

Loading & Unloading of vessels

Through our sister company Euroports or other terminal handling companies, we can organize the loading and unloading of vessels

Insurance & Surveys

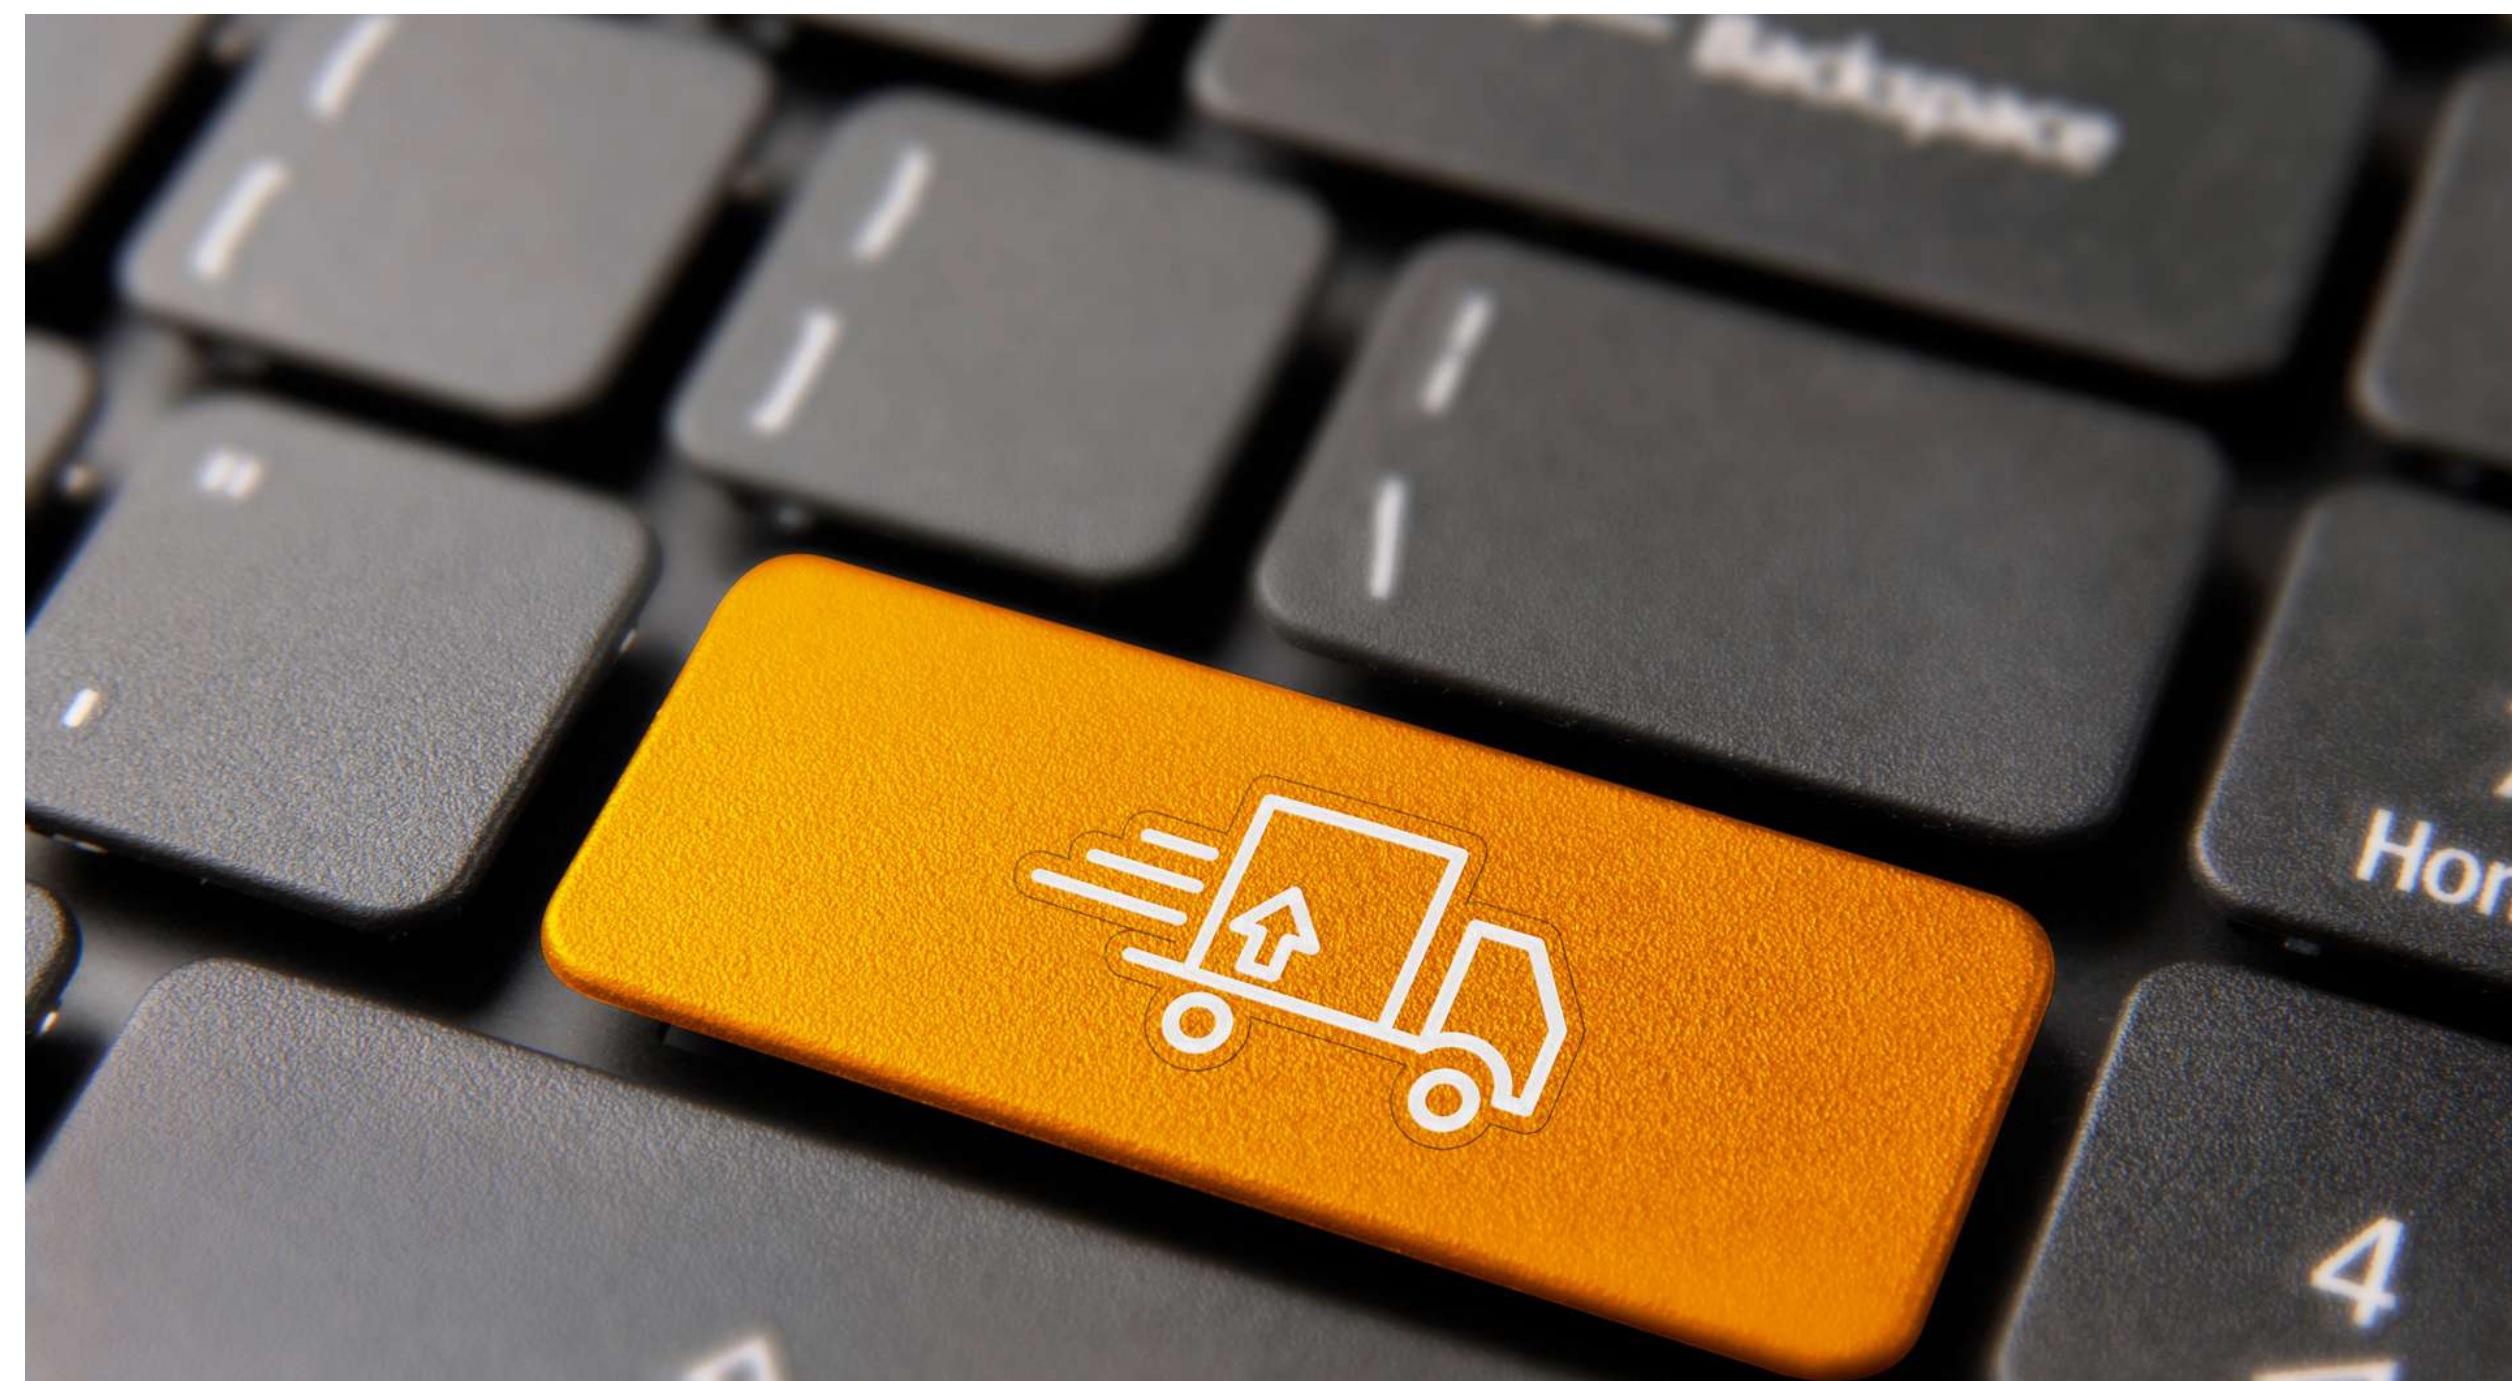

On request, we will arrange cargo insurance for our customers.

insurance

Our in-house and third party experts make sure you are informed at all times about the quality of your incoming and outgoing cargo.

Time Critical Services

TZD Global can offer time-critical deliveries for aerospace/AOG (aircraft on ground) and other time-critical industries, including on-board carrier and hand carriage if required.

Liquids

Specialized in Liquids

In our specialized Liquids Division, we assist our customers in the full handling of their liquid logistics. We are present in the global liquid hubs and in all major economic growth areas, where we act as local experts. In addition, we offer an extensive, exclusive liquids agent network to cover our global scale.

Whether you are looking to repack your bulk into small packs (250ml-30L), carry out your drumming/IBC filling (60L-1000L) or ship your packed material; Welcome to TZD Global Liquids.

Shipping bulk? We have the expertise in both ISO and flexitank shipments defining new market standards by offering unique guarantees and full independence, yet continuing to apply TZD's 'Be Different' methods.

Our flexitanks are accessible in single and multi-layers, containing a state-of-the-art bulkhead and protected by a unique insurance and emergency response plan to the benefit of our customers. Within TZD Global Liquids we also offer tank storage, liquid barging, chartering of parcel tankers, short and long-term equipment lease and all related extra liquid-handling services.
